

Exercises:

- (1) Load the health data frame by typing in the following command:

```
load(url("http://www.stat.berkeley.edu/share/
rvideos/data/health.rda"))
```

How do I look at the first 10 entries of the data frame?

- (2) How do you find out how many rows and columns does a data frame have?
- (3) How do I get only the maximum weight from the *Health* data frame?
