

Cross-validated error plots for national and regional point predictions

(A) The average point prediction error against epidemic weeks aligned by the observed onset and peak week.

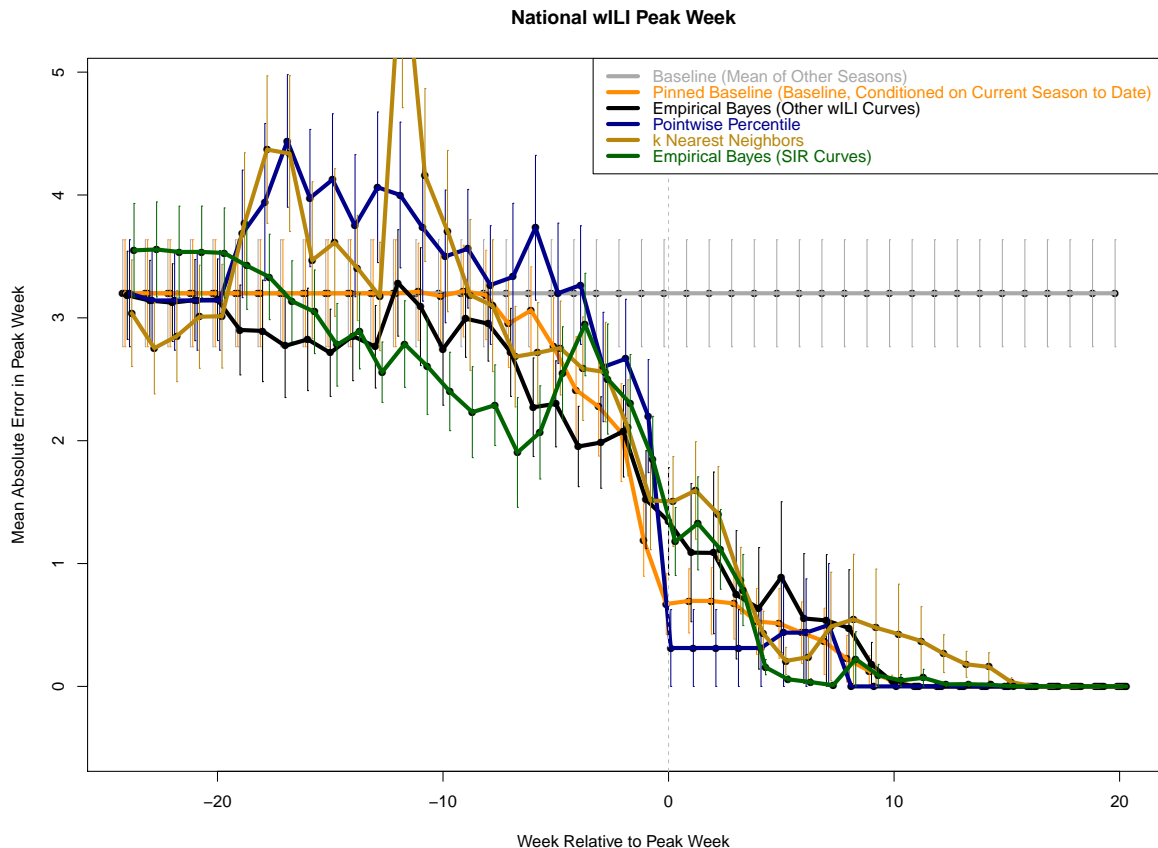

Cross-validated error plots for national and regional point predictions

(A) The average point prediction error against epidemic weeks aligned by the observed onset and peak week.

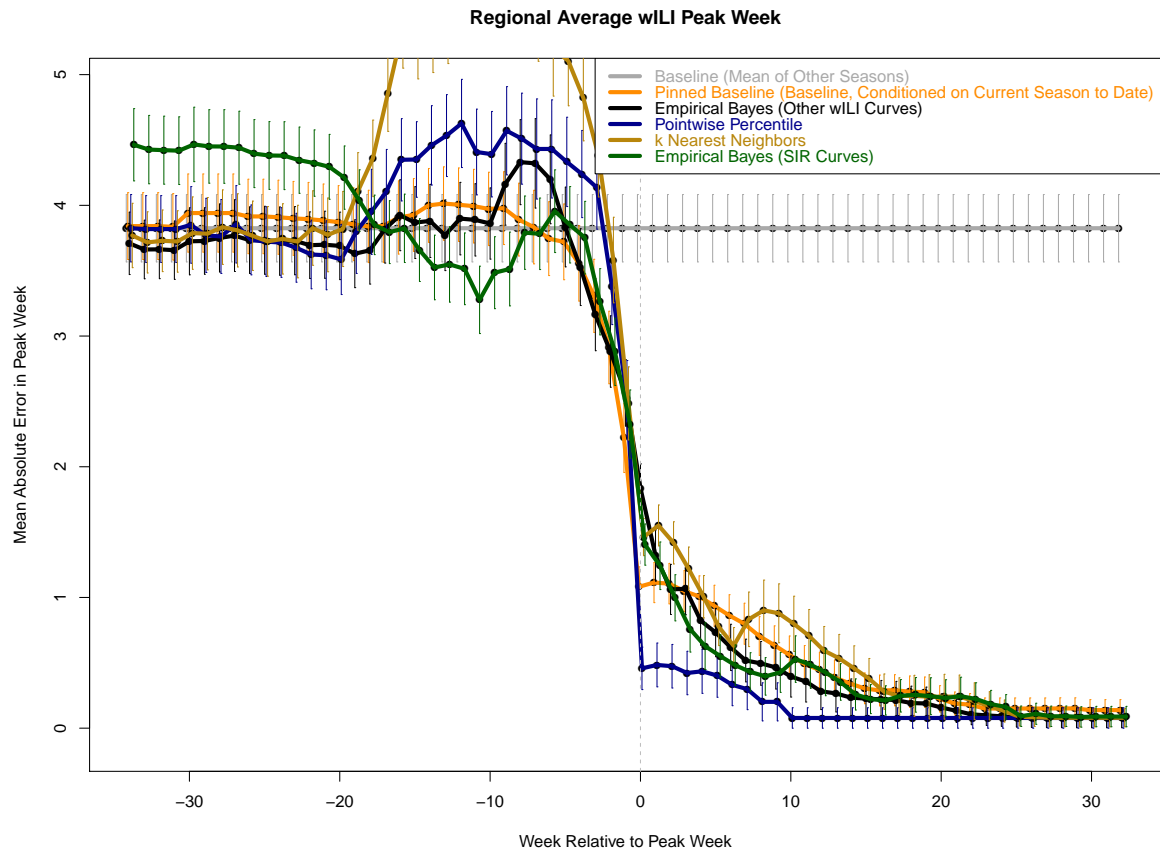

Cross-validated error plots for national and regional point predictions

(A) The average point prediction error against epidemic weeks aligned by the observed onset and peak week.

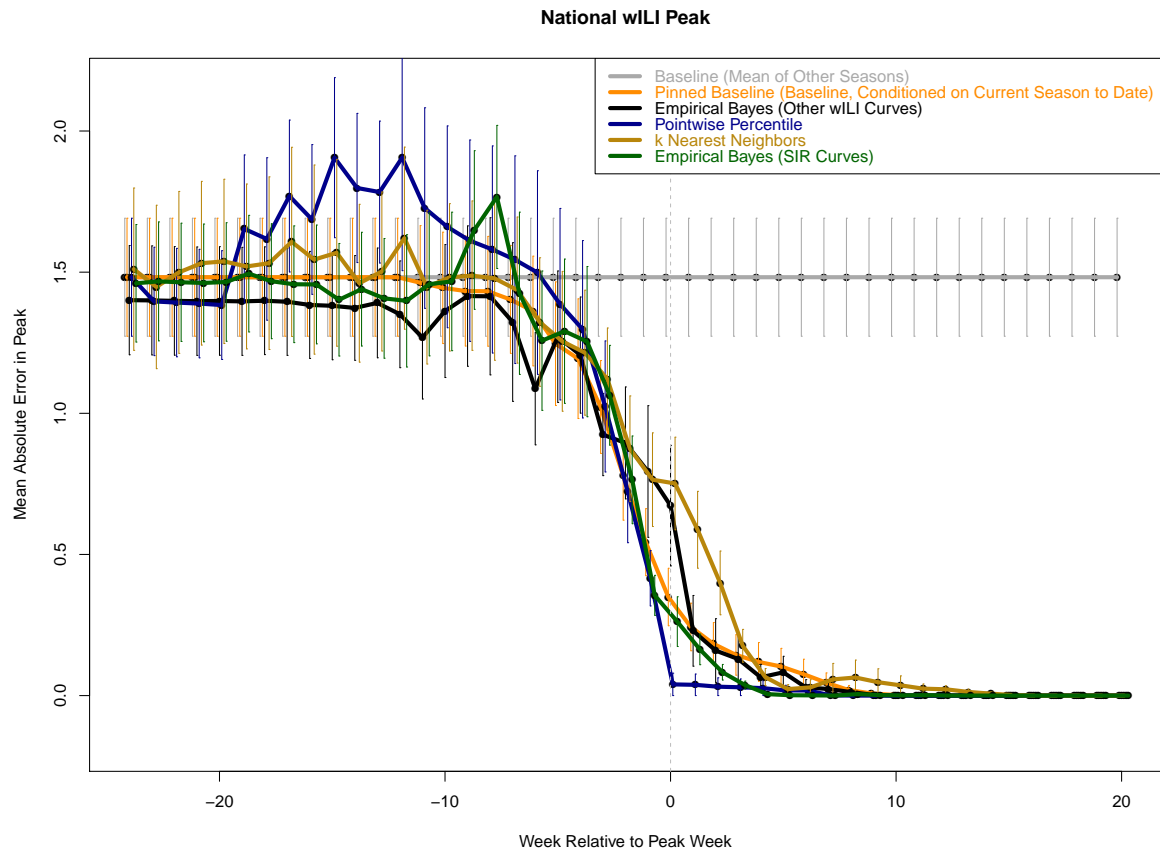

Cross-validated error plots for national and regional point predictions

(A) The average point prediction error against epidemic weeks aligned by the observed onset and peak week.

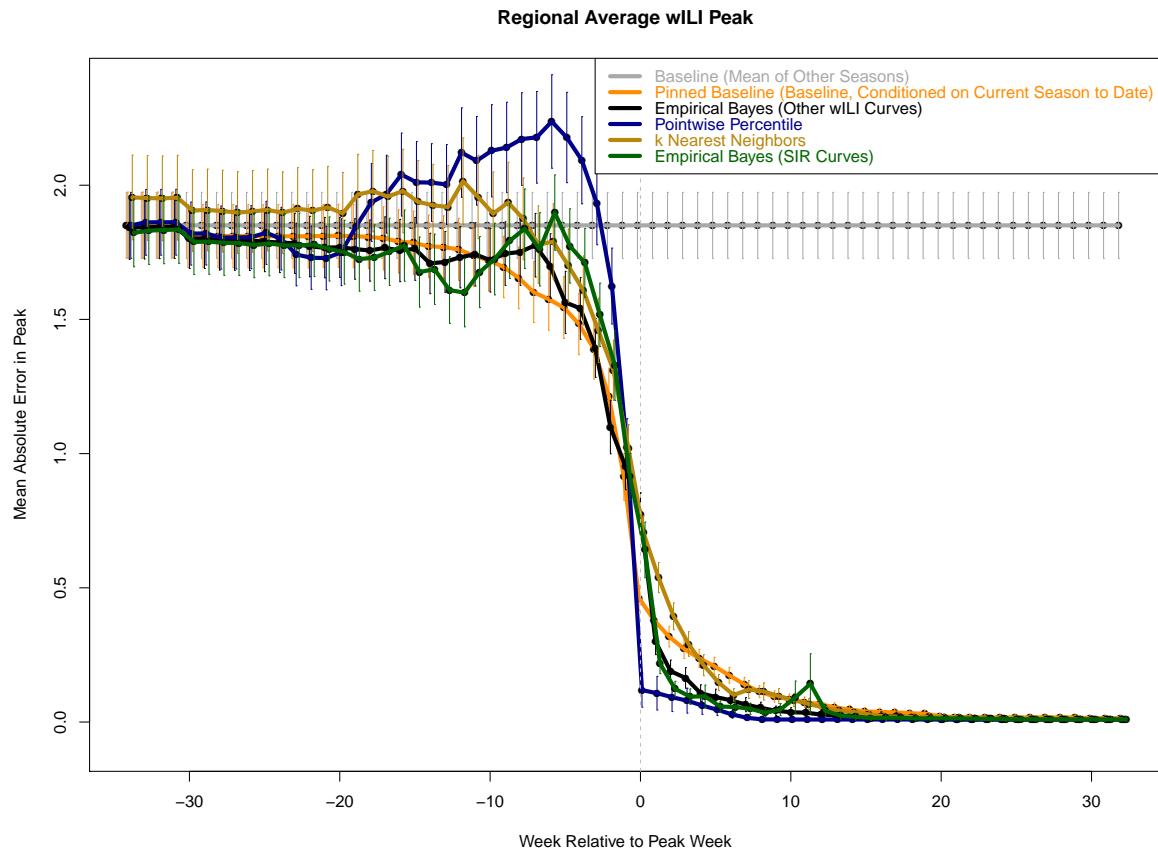

Cross-validated error plots for national and regional point predictions

(A) The average point prediction error against epidemic weeks aligned by the observed onset and peak week.

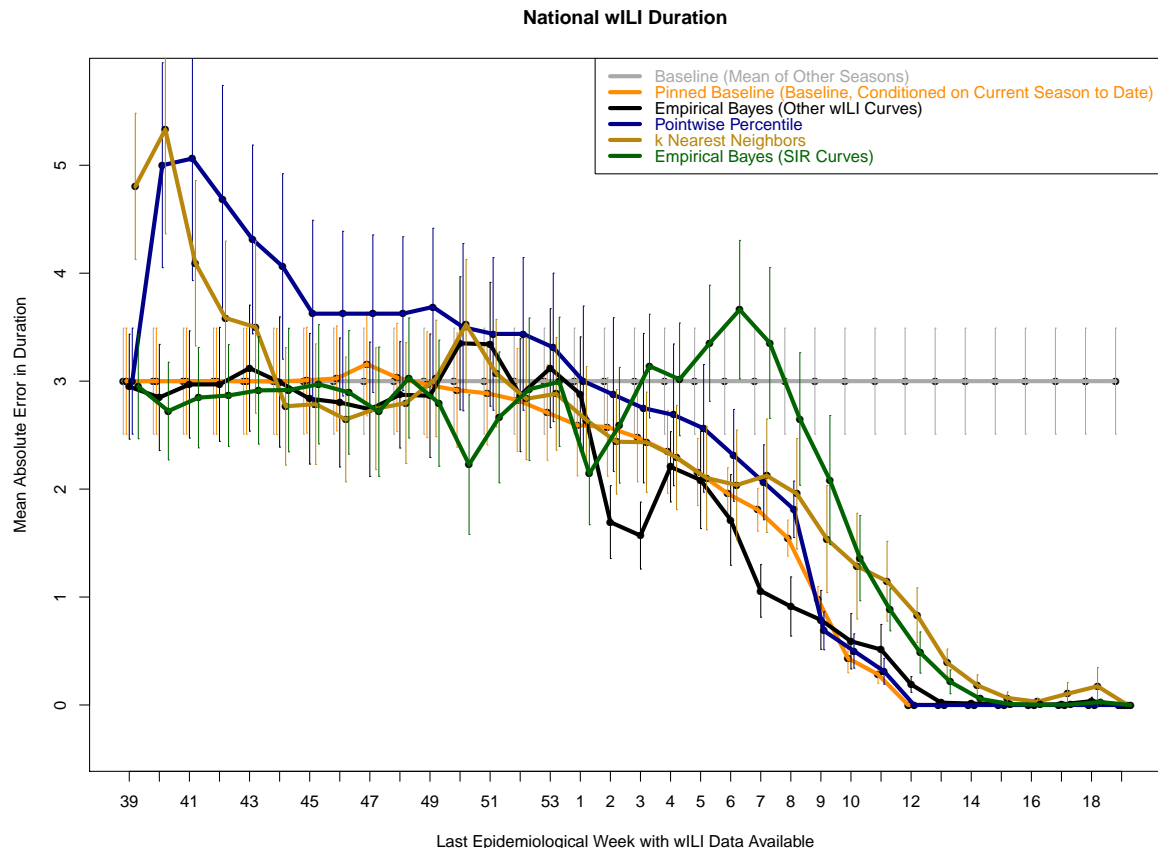

Cross-validated error plots for national and regional point predictions

(A) The average point prediction error against epidemic weeks aligned by the observed onset and peak week.

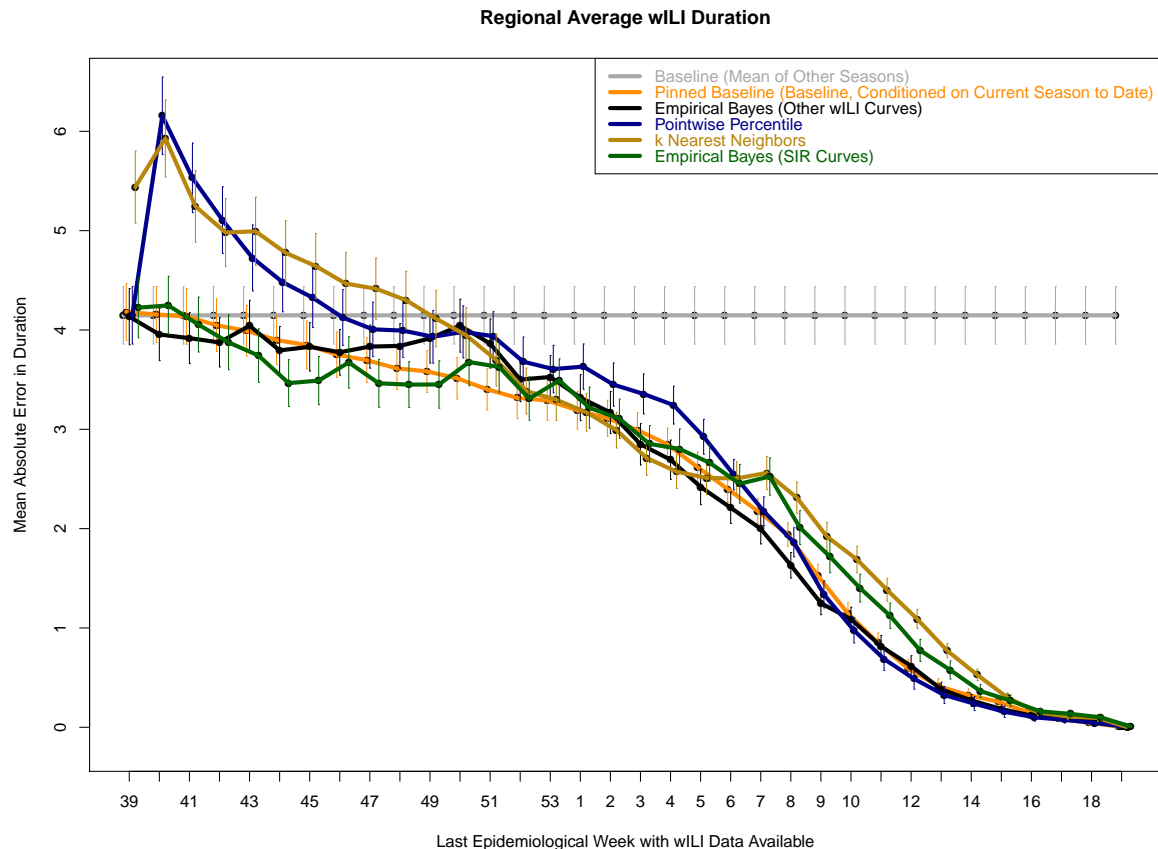

Cross-validated error plots for national and regional point predictions

(A) The average point prediction error against epidemic weeks aligned by the observed onset and peak week.

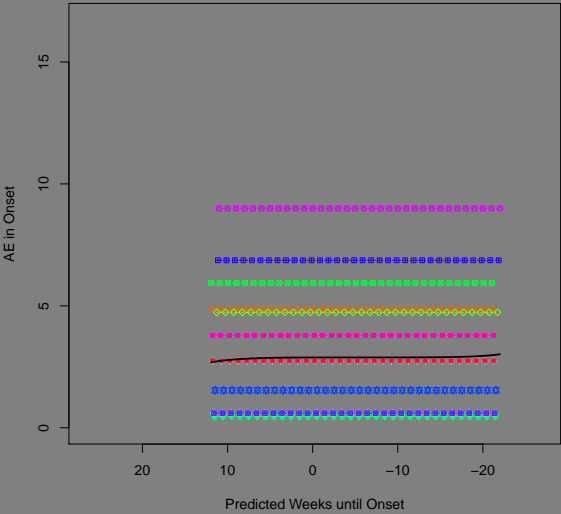

Cross-validated error plots for national and regional point predictions

(A) The average point prediction error against epidemic weeks aligned by the observed onset and peak week.

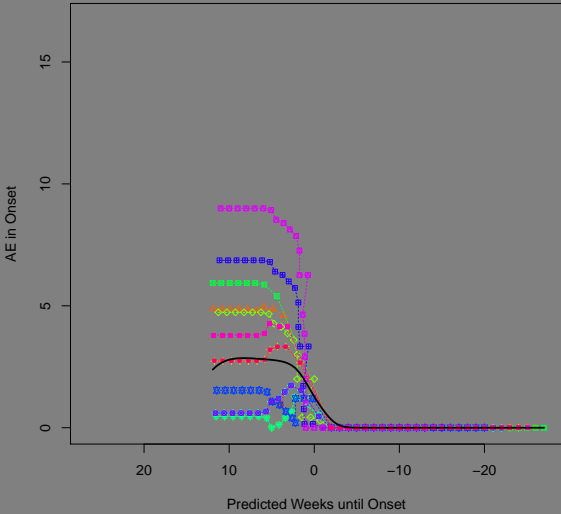

Cross-validated error plots for national and regional point predictions
(B) The point prediction error distribution and mean against predicted onset and peak week.

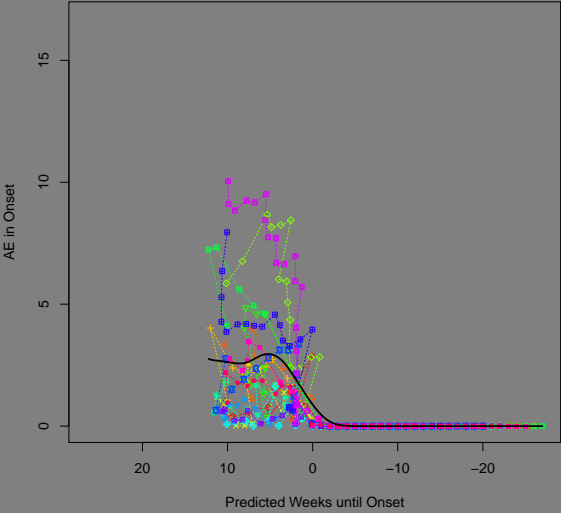

Pt Pred–Aligned Baseline Pt Pred on National wILI

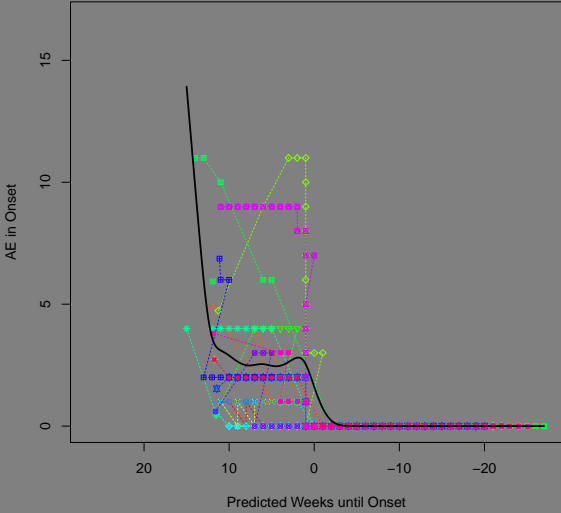

Pt Pred–Aligned Pinned Baseline Pt Pred on National wILI

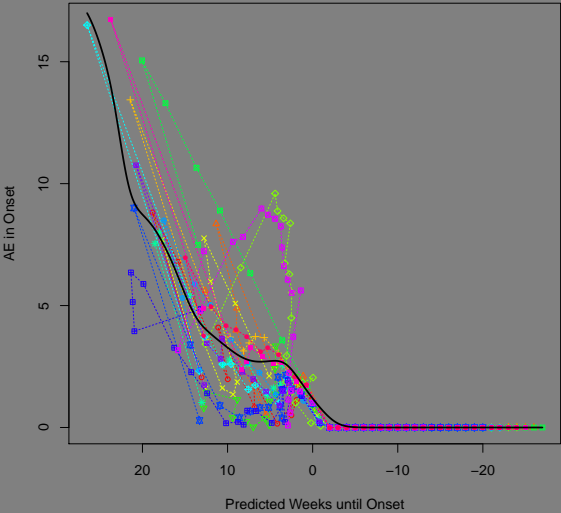

Pt Pred–Aligned EB (wILI Curves) Pt Pred on National wILI

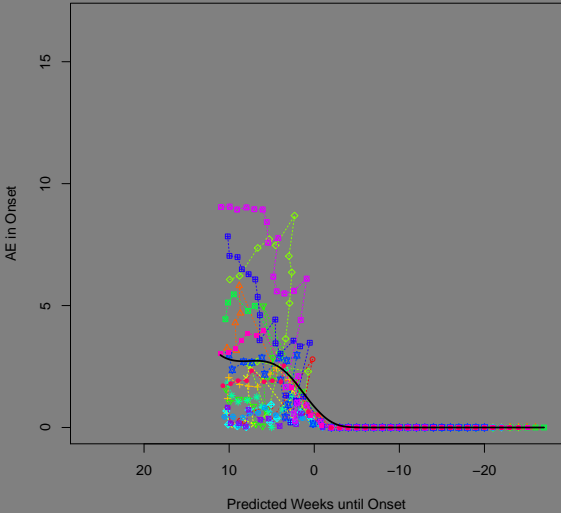

Pt Pred–Aligned Pointwise Percentile Pt Pred on National wILI

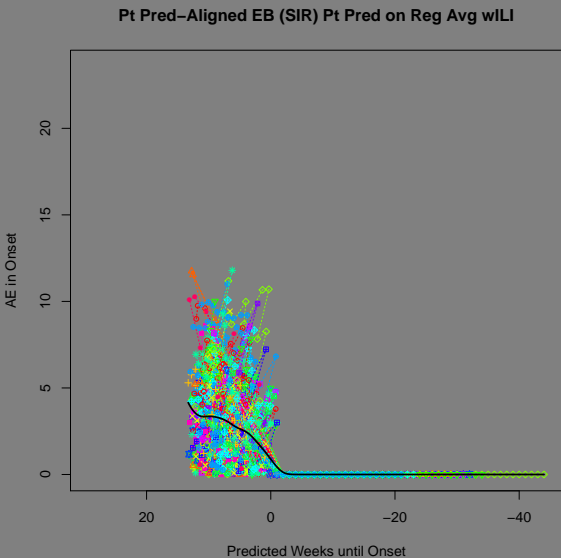

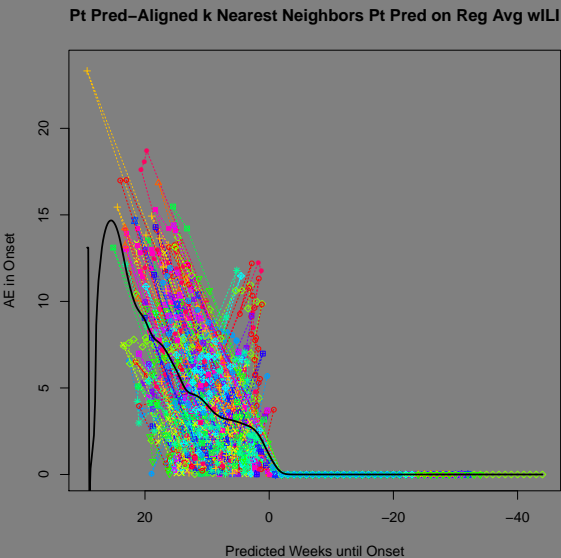

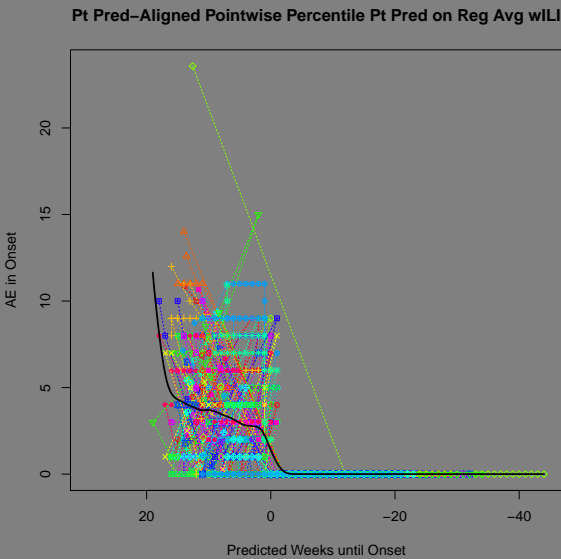

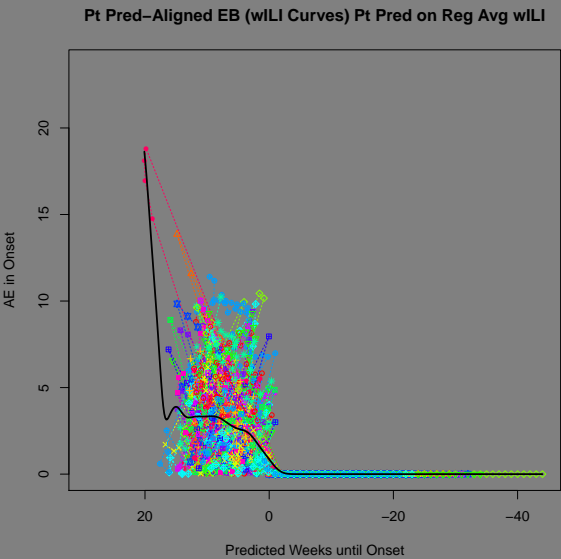

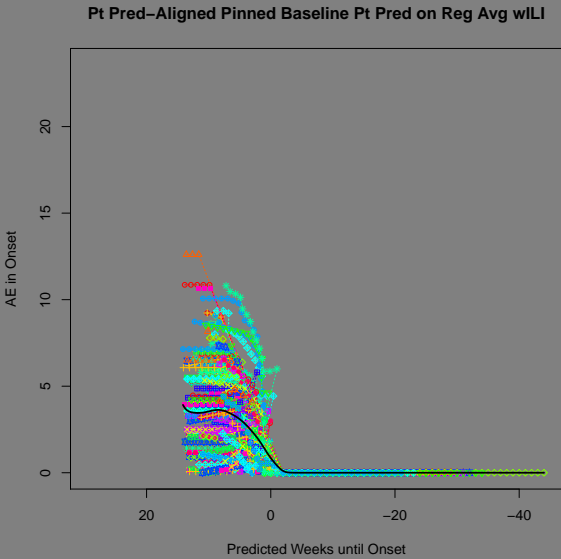

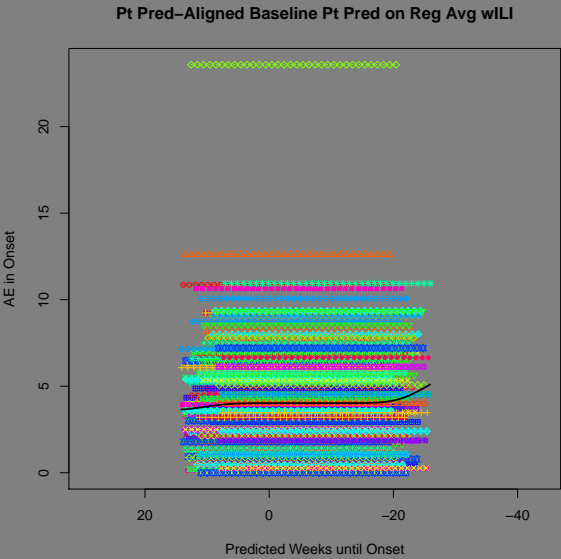

Pt Pred–Aligned k Nearest Neighbors Pt Pred on National wILI

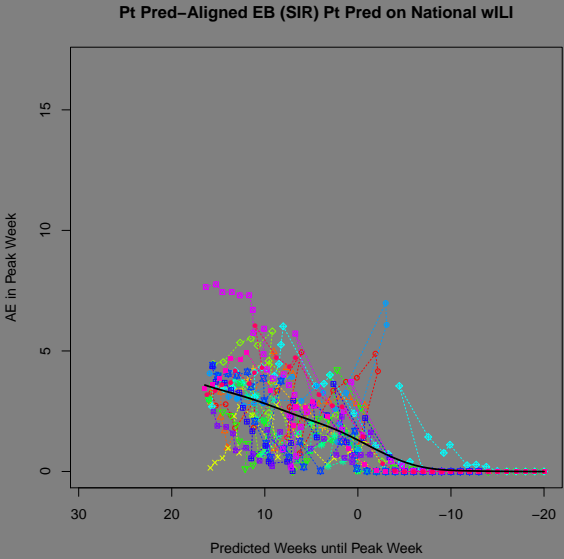

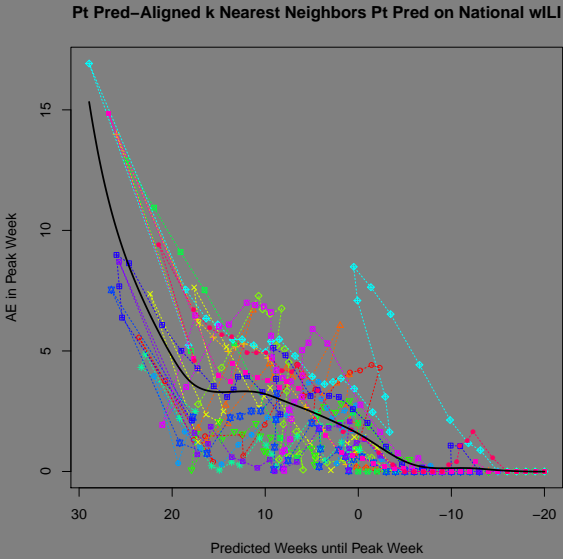

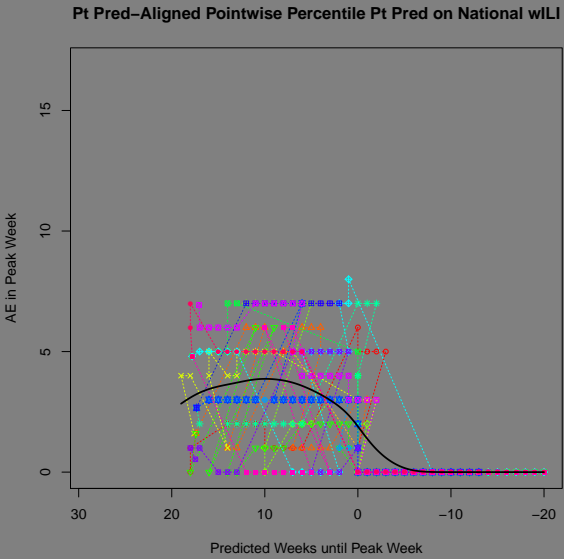

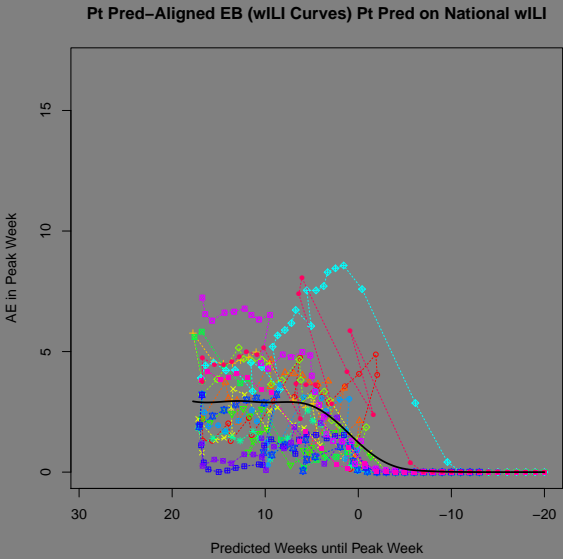

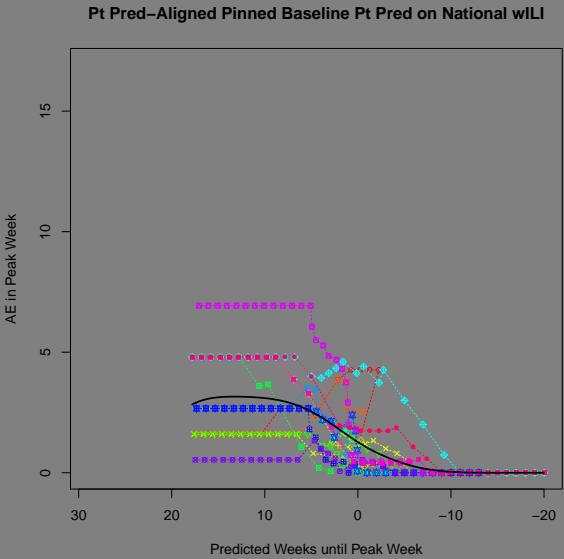

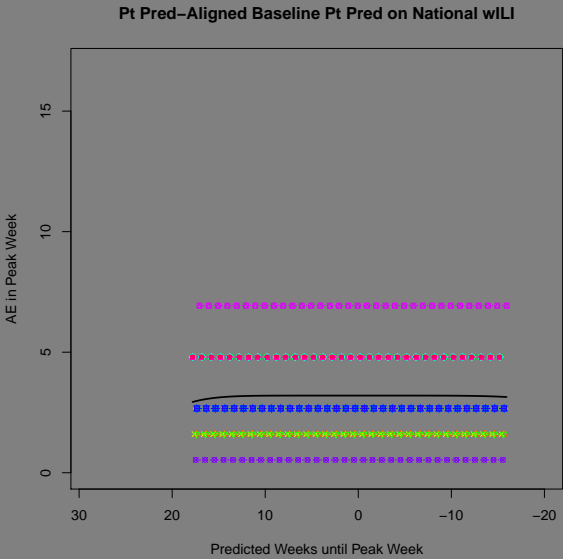

Pt Pred–Aligned EB (SIR) Pt Pred on National wILI

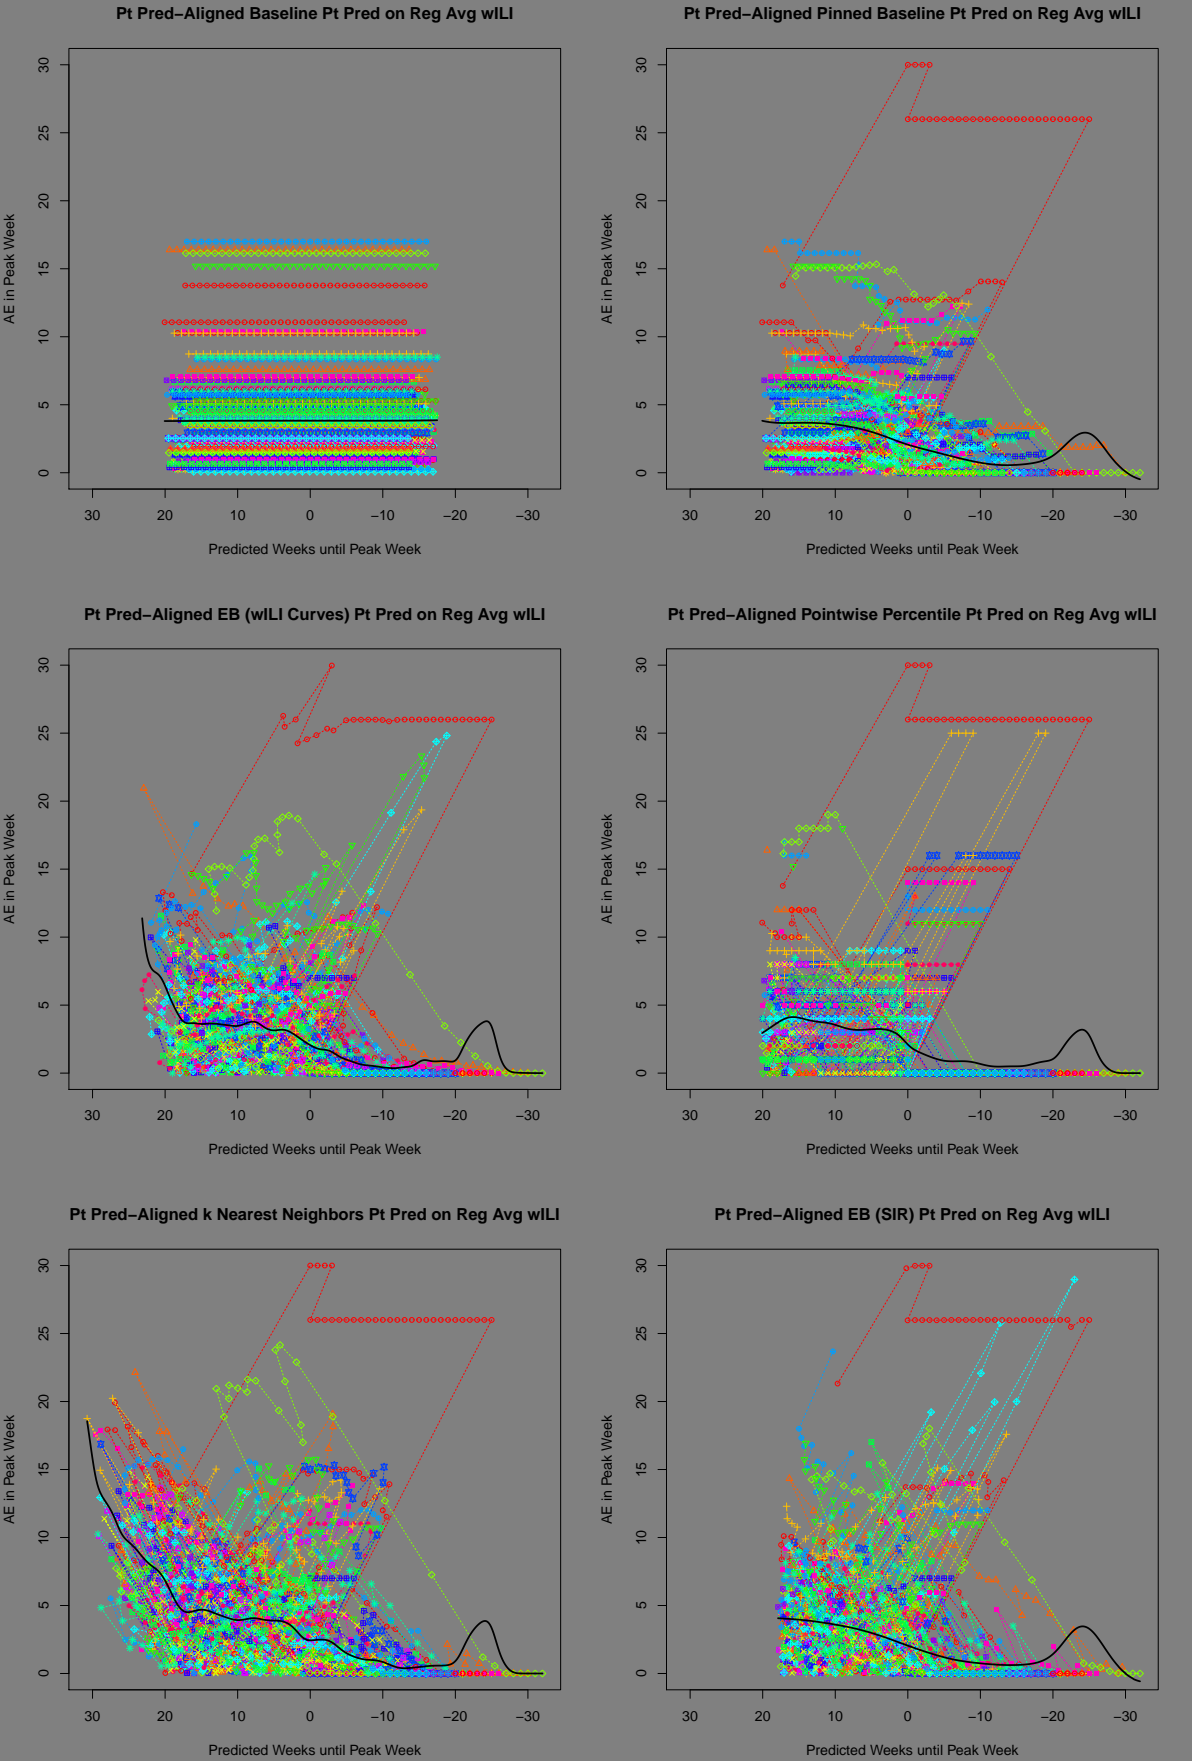

Cross-validated error plots for national and regional point predictions
(B) The point prediction error distribution and mean against predicted onset and peak week.

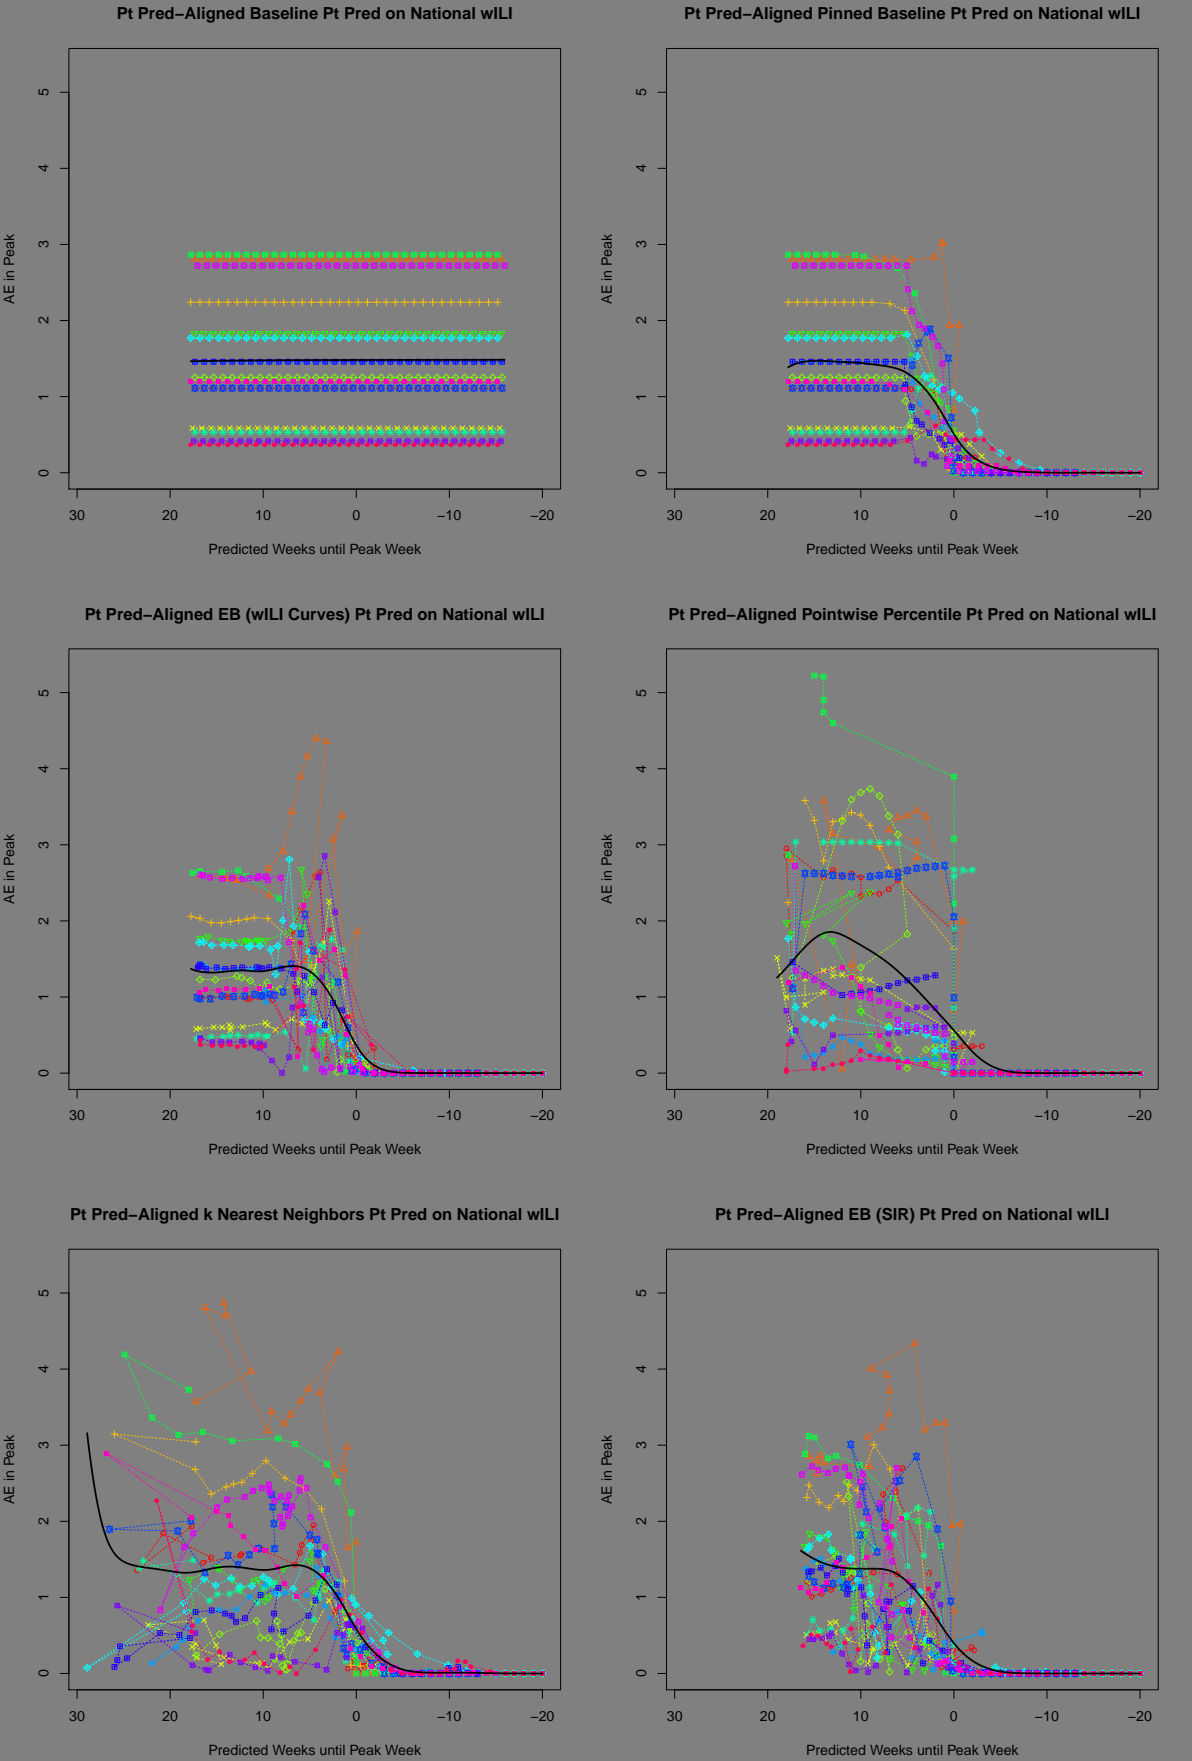

Cross-validated error plots for national and regional point predictions
(B) The point prediction error distribution and mean against predicted onset and peak week.

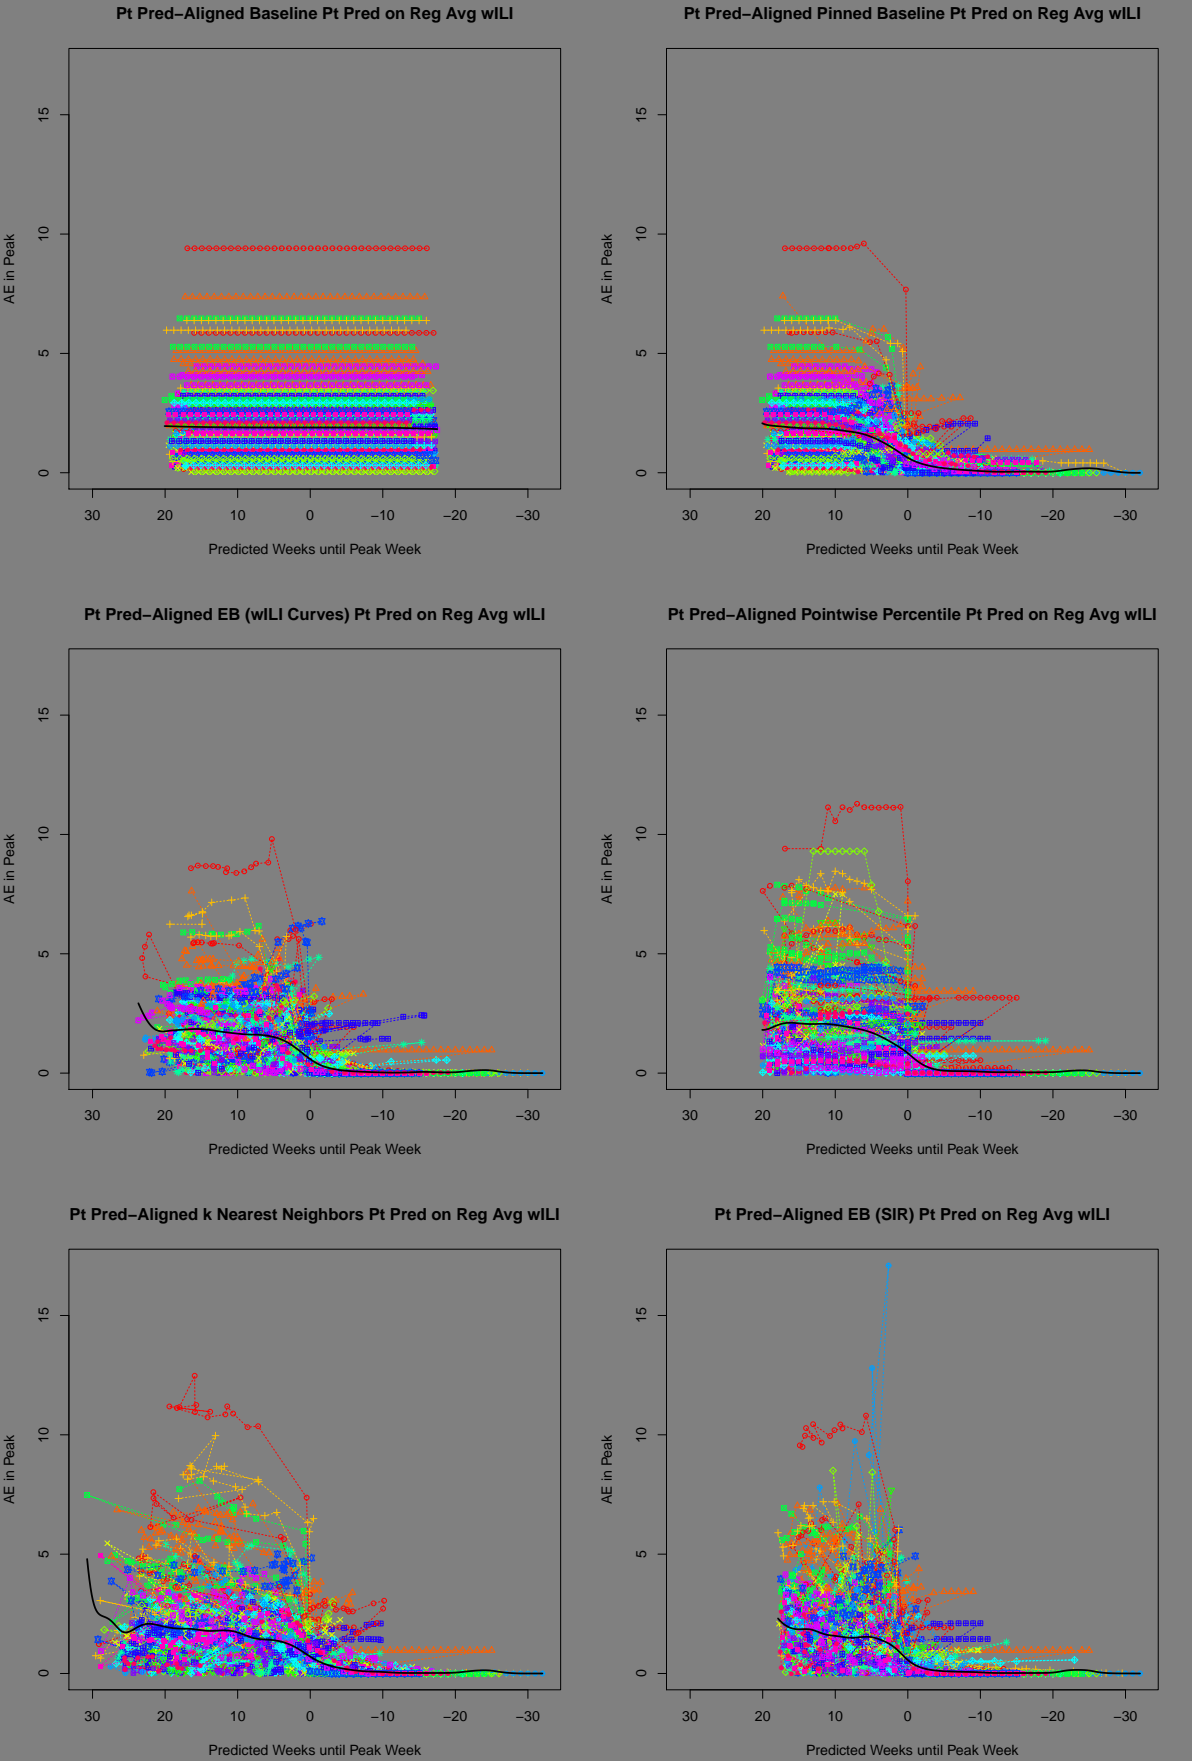

Cross-validated error plots for national and regional point predictions
(B) The point prediction error distribution and mean against predicted onset and peak week.

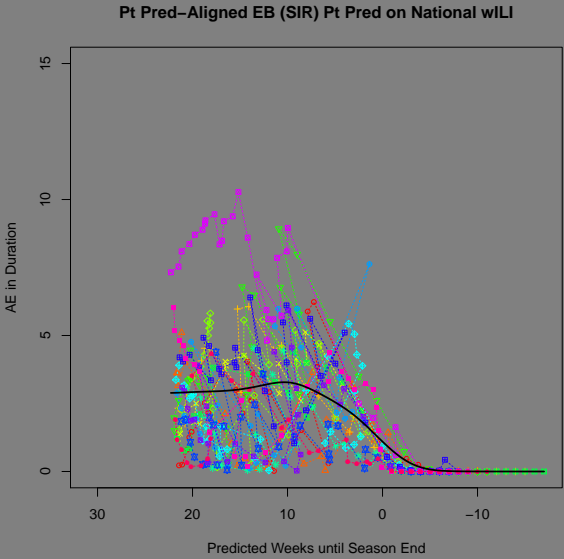

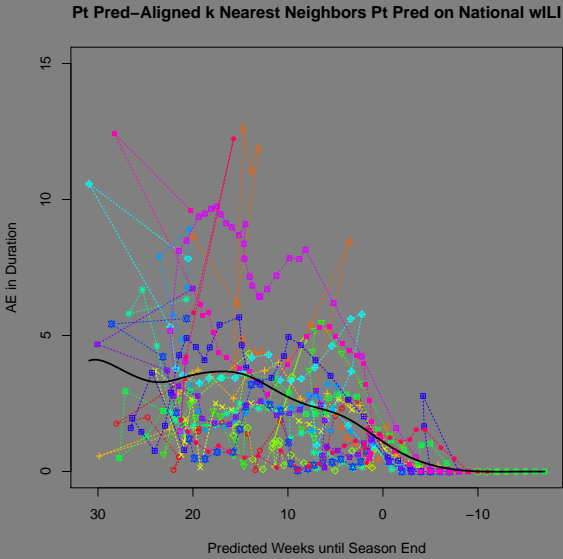

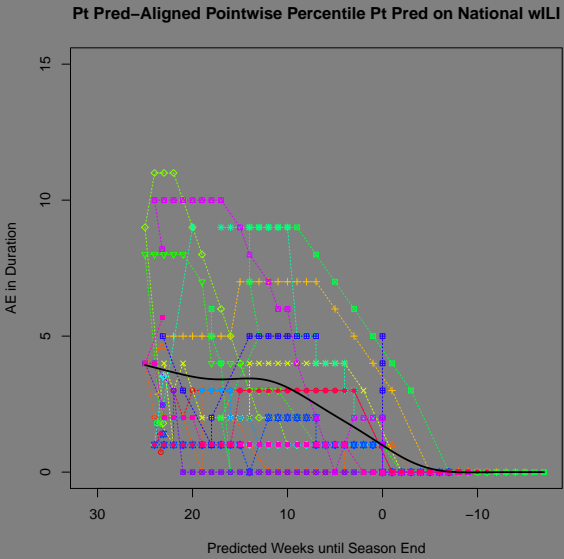

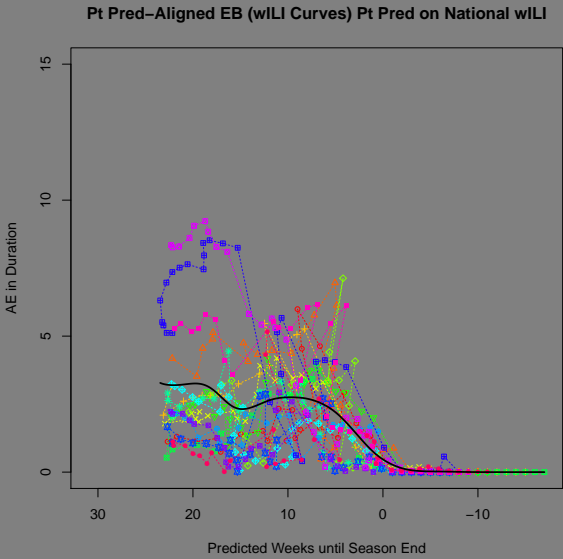

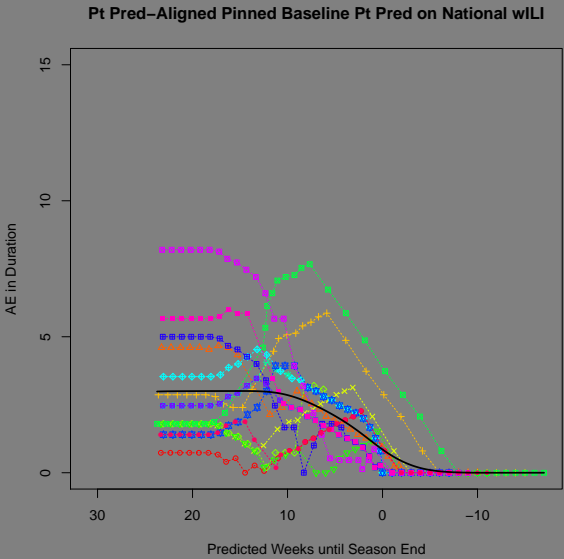

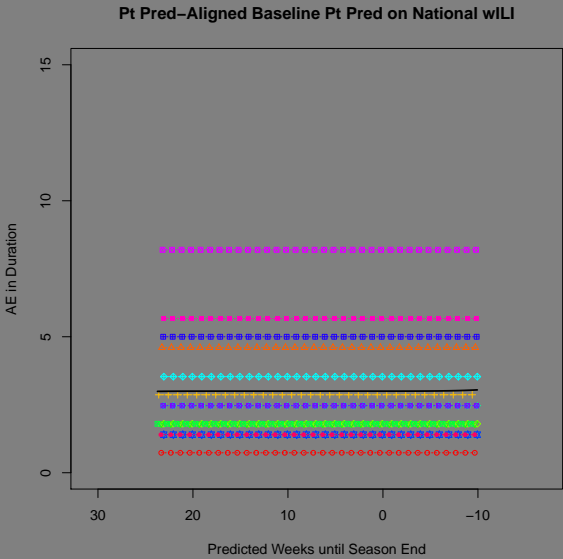

Cross-validated error plots for national and regional point predictions
(B) The point prediction error distribution and mean against predicted onset and peak week.

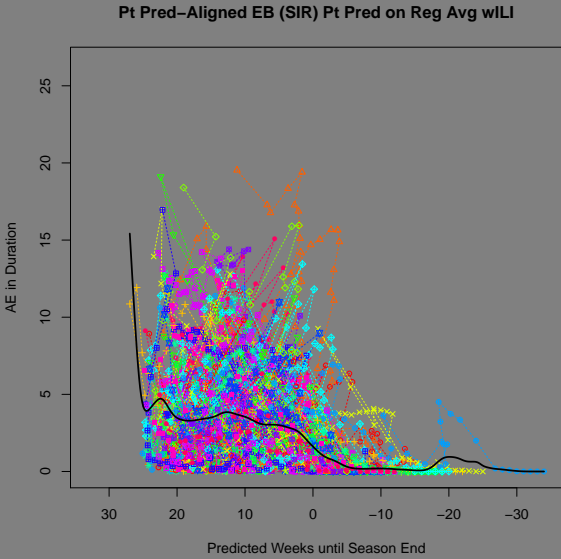

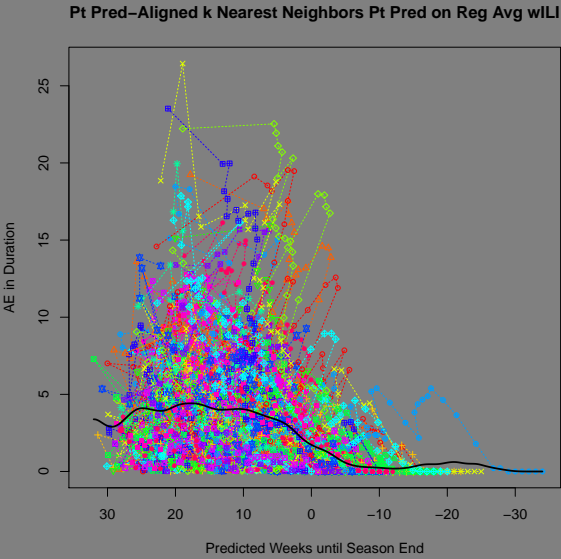

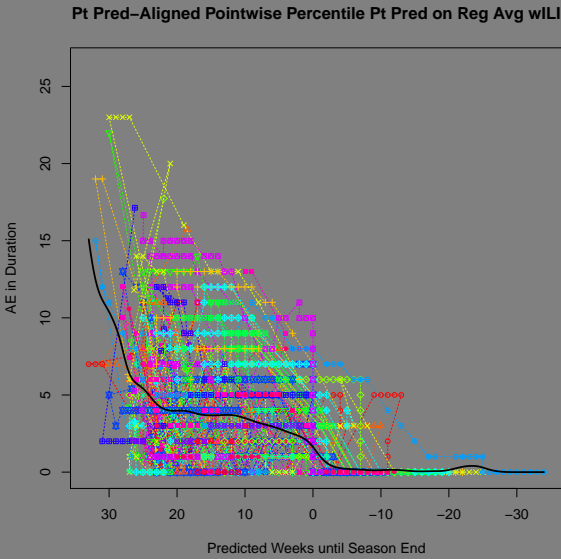

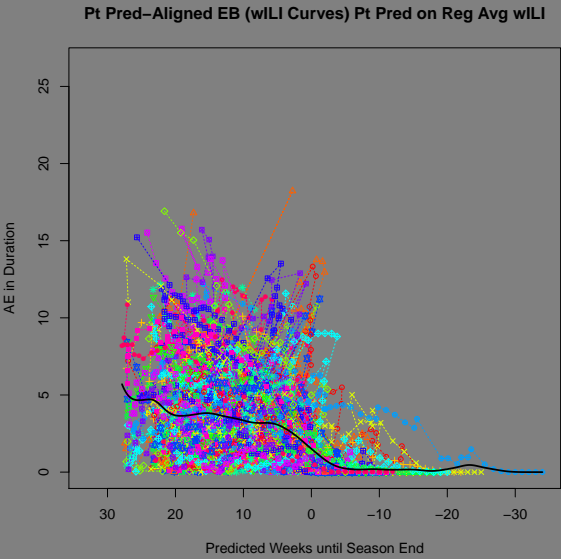

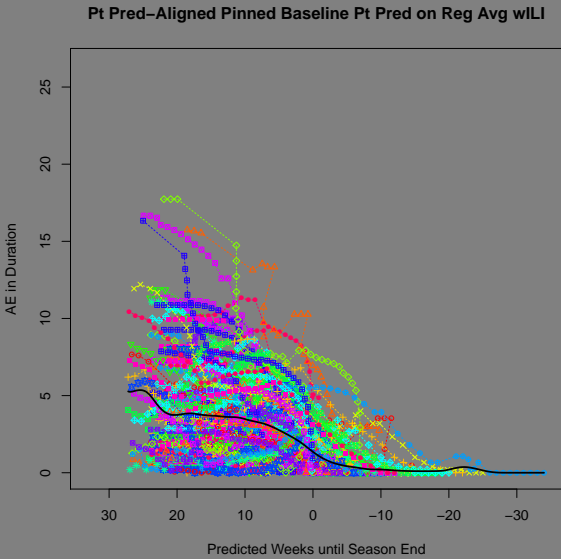

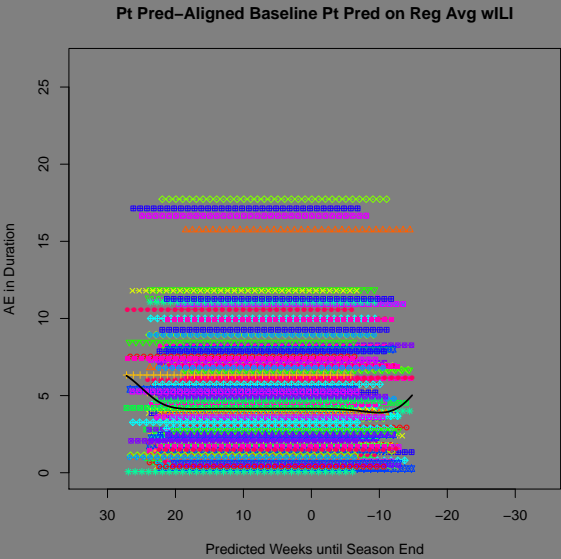

Cross-validated error plots for national and regional point predictions
(B) The point prediction error distribution and mean against predicted onset and peak week.

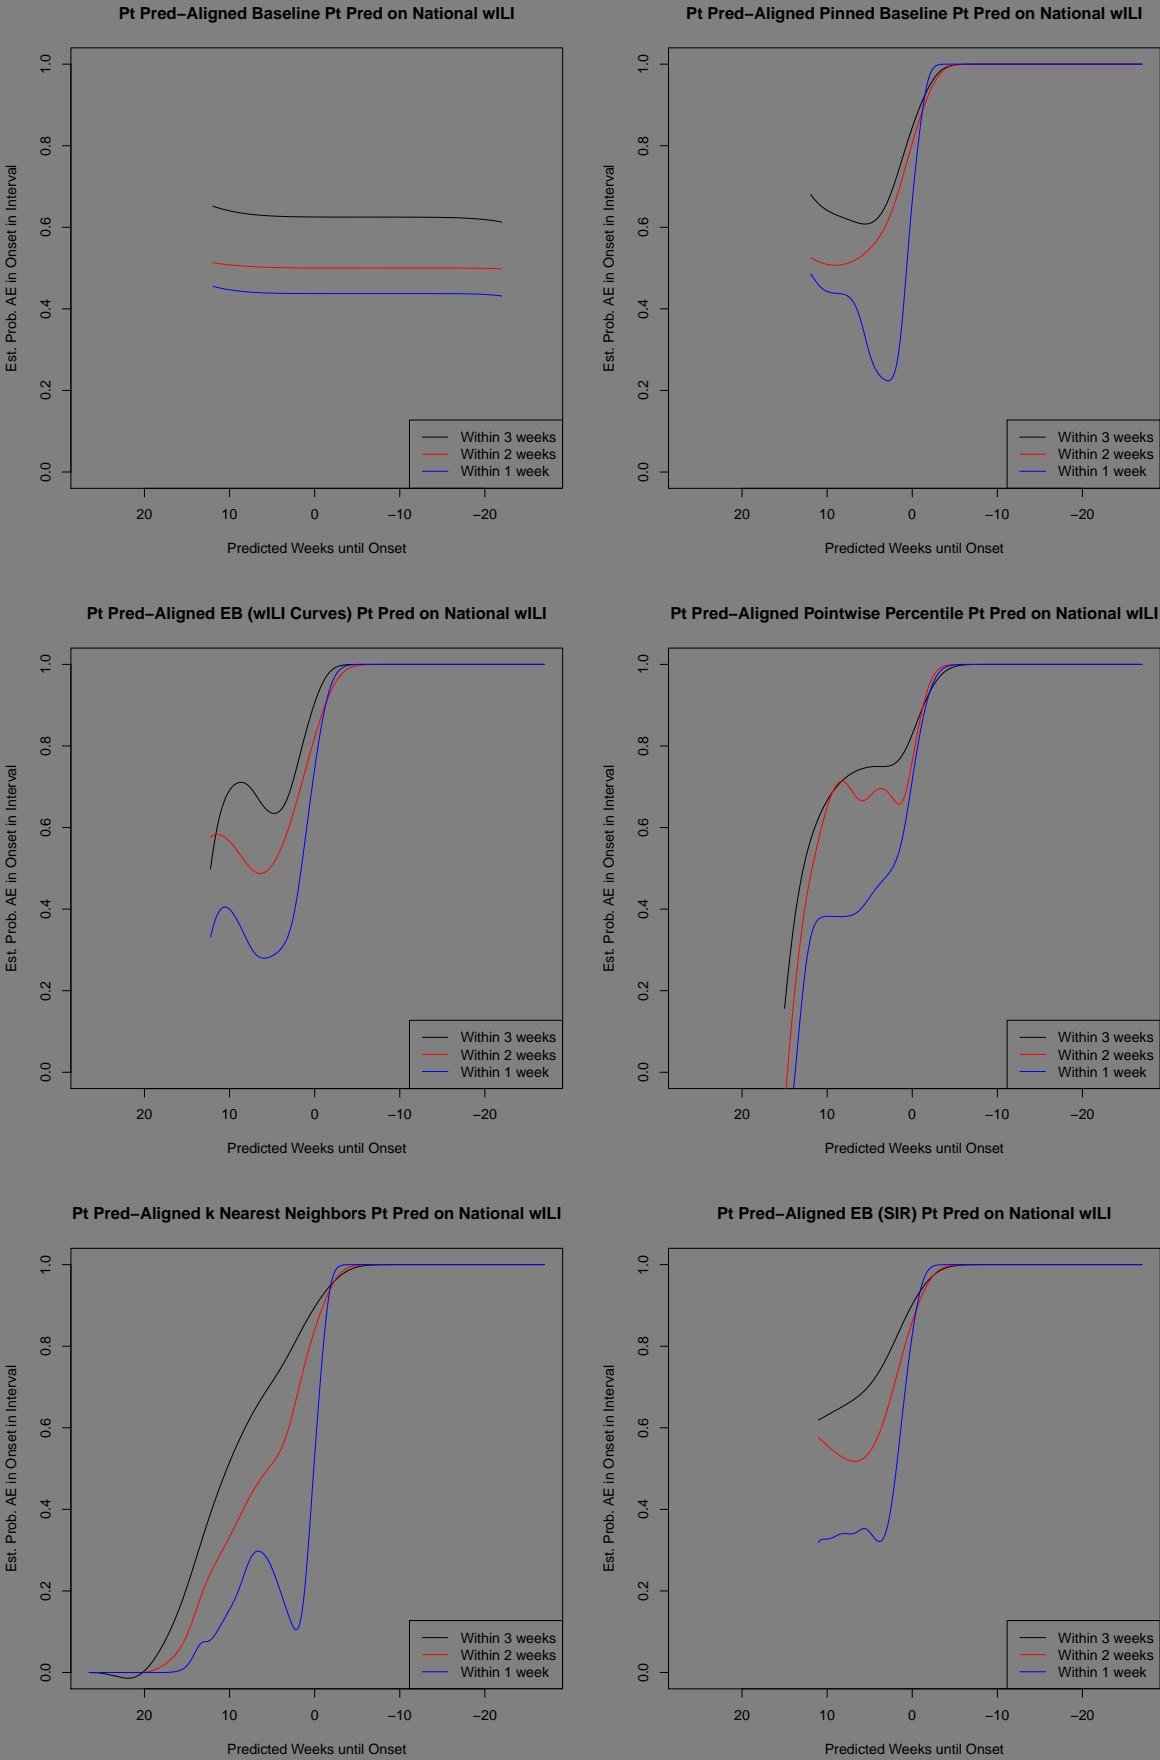

Cross-validated error plots for national and regional point predictions
(B) The point prediction error distribution and mean against predicted onset and peak week.

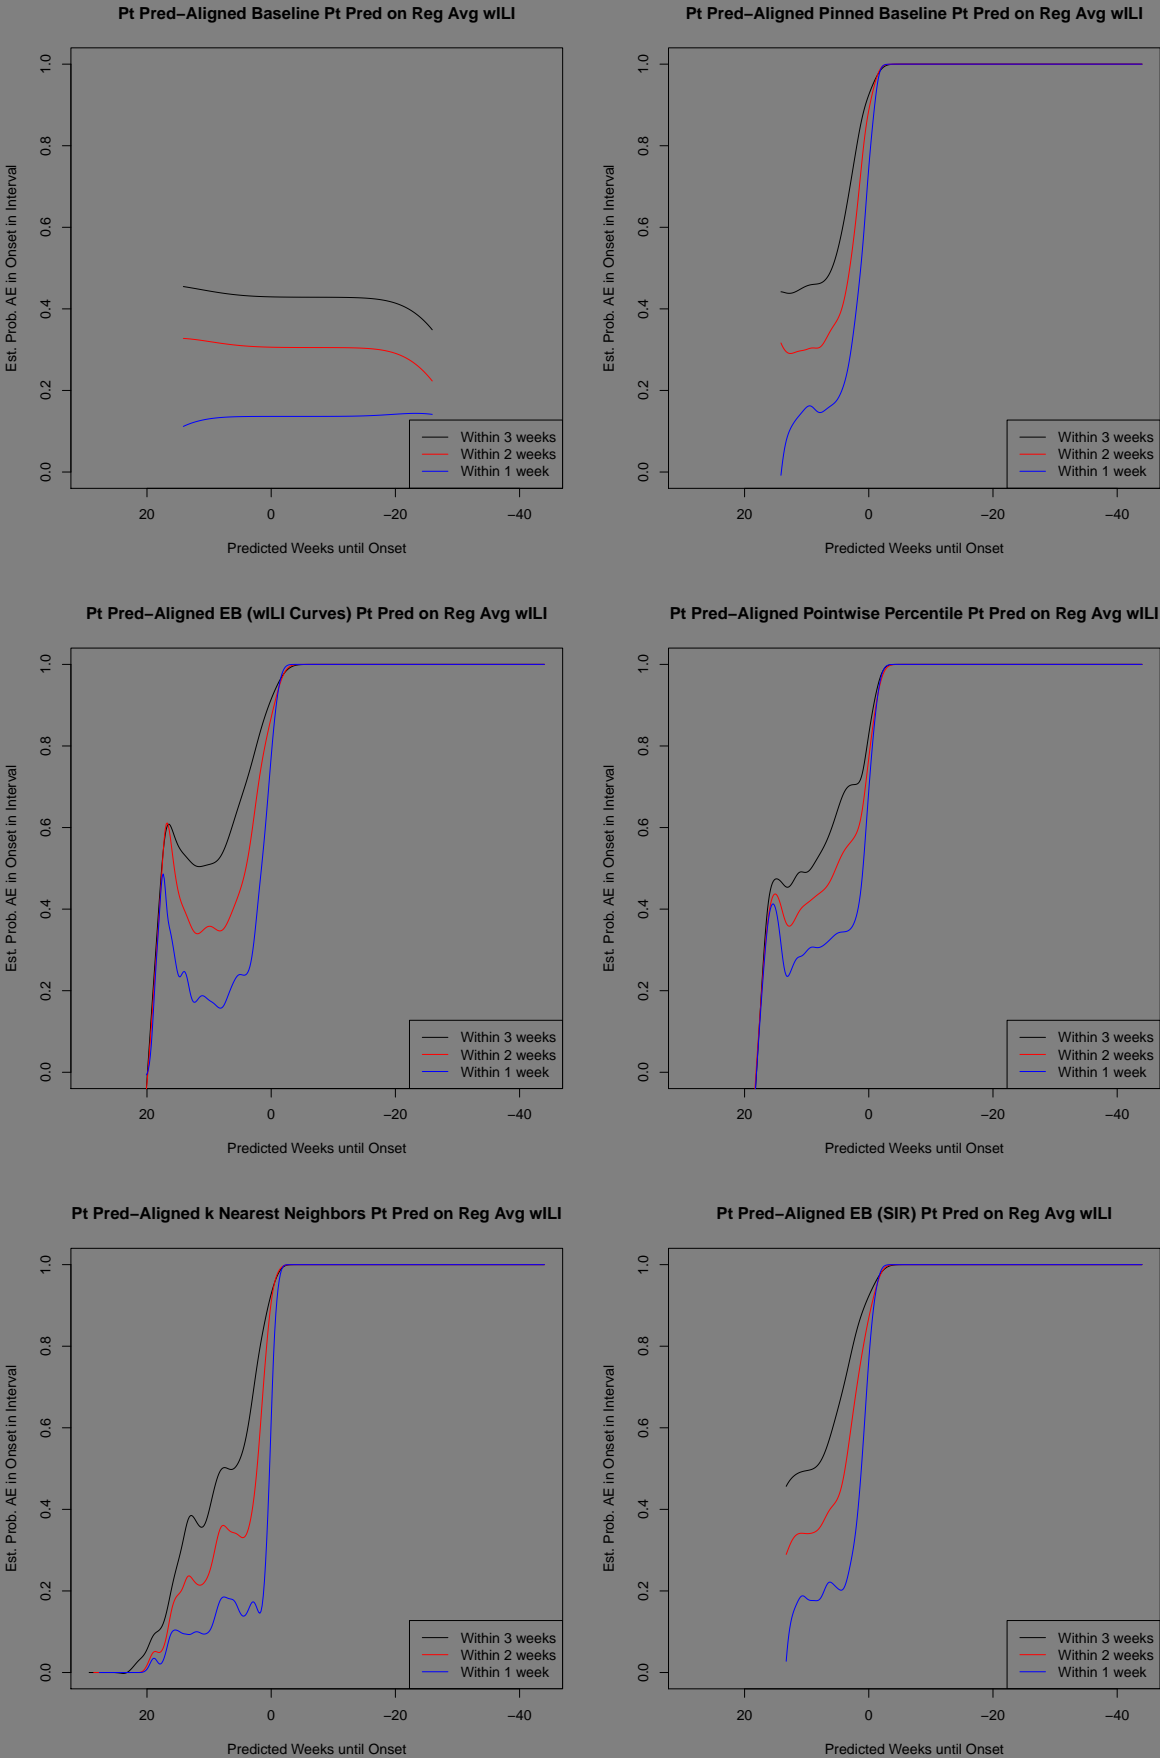

Cross-validated error plots for national and regional point predictions
(B) The point prediction error distribution and mean against predicted onset and peak week.

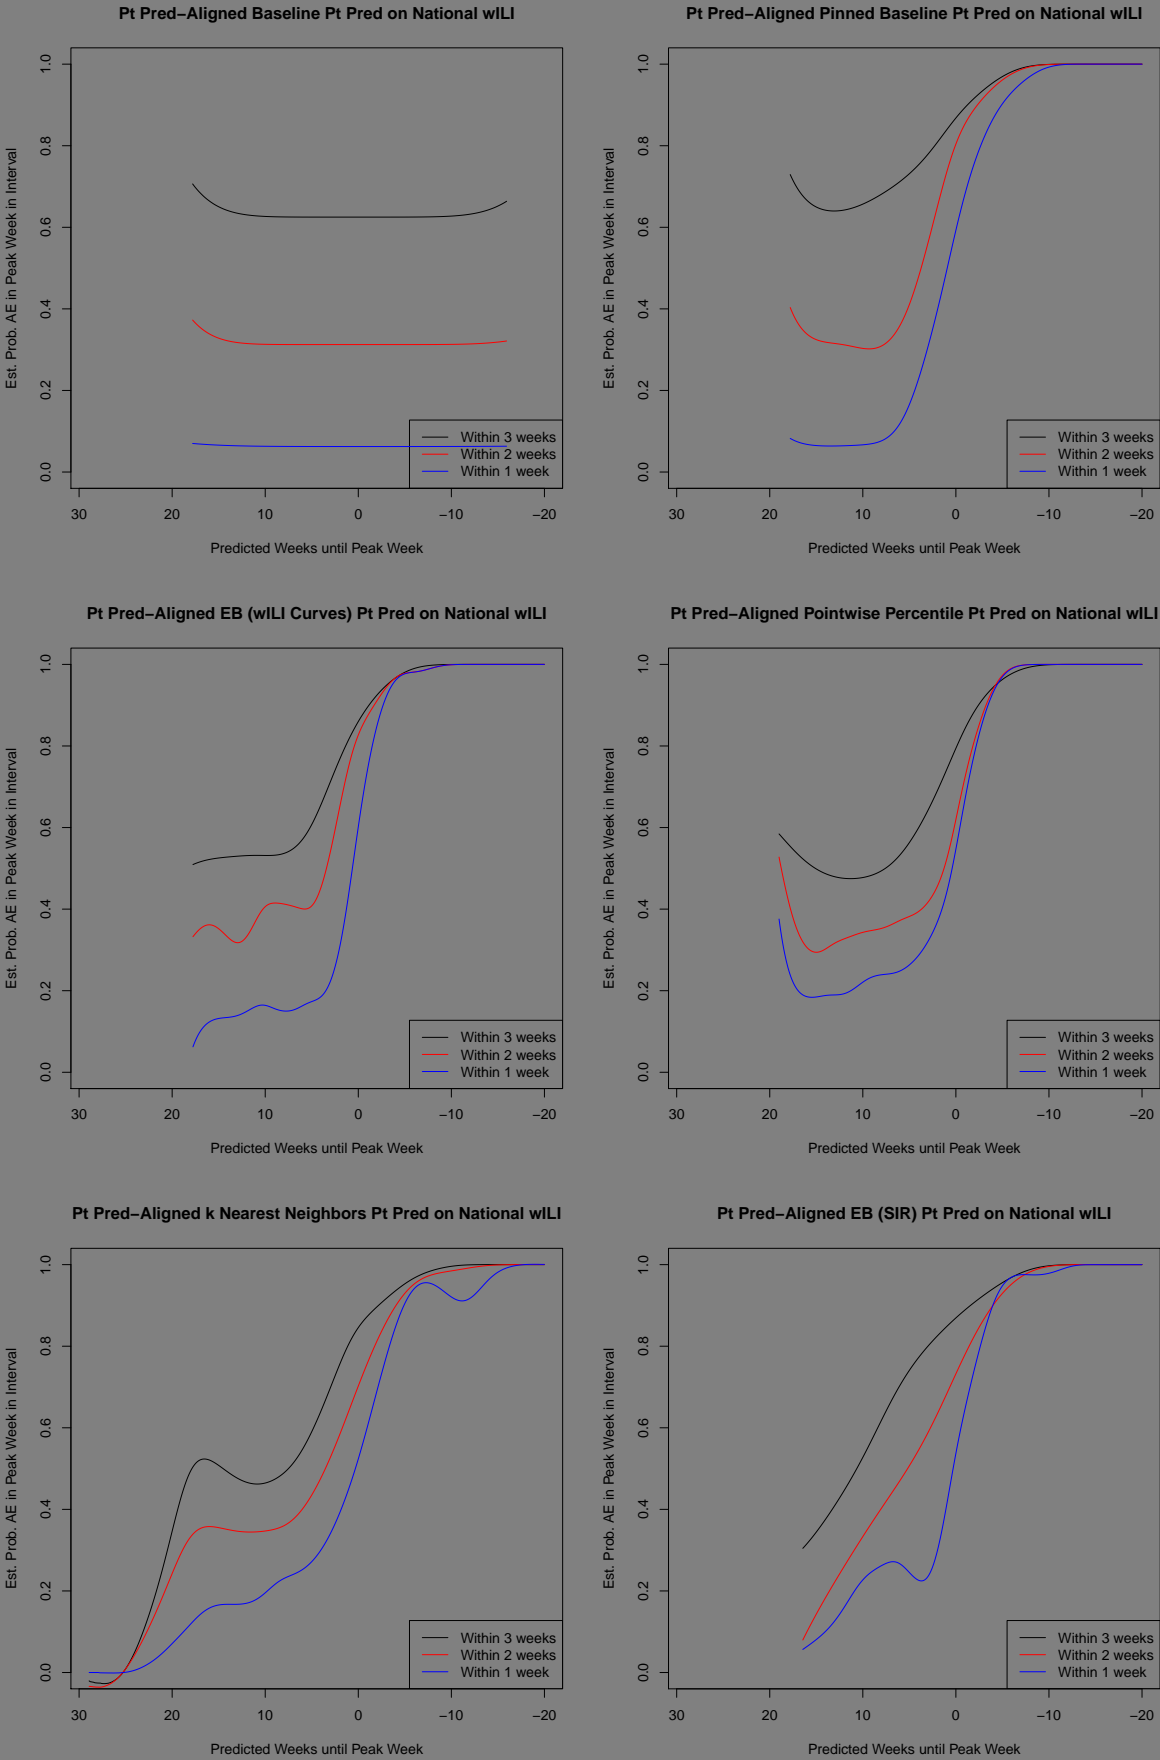

Cross-validated error plots for national and regional point predictions
(C) The estimated probability of point predictions being within certain thresholds of the observed values against predicted onset and peak week.

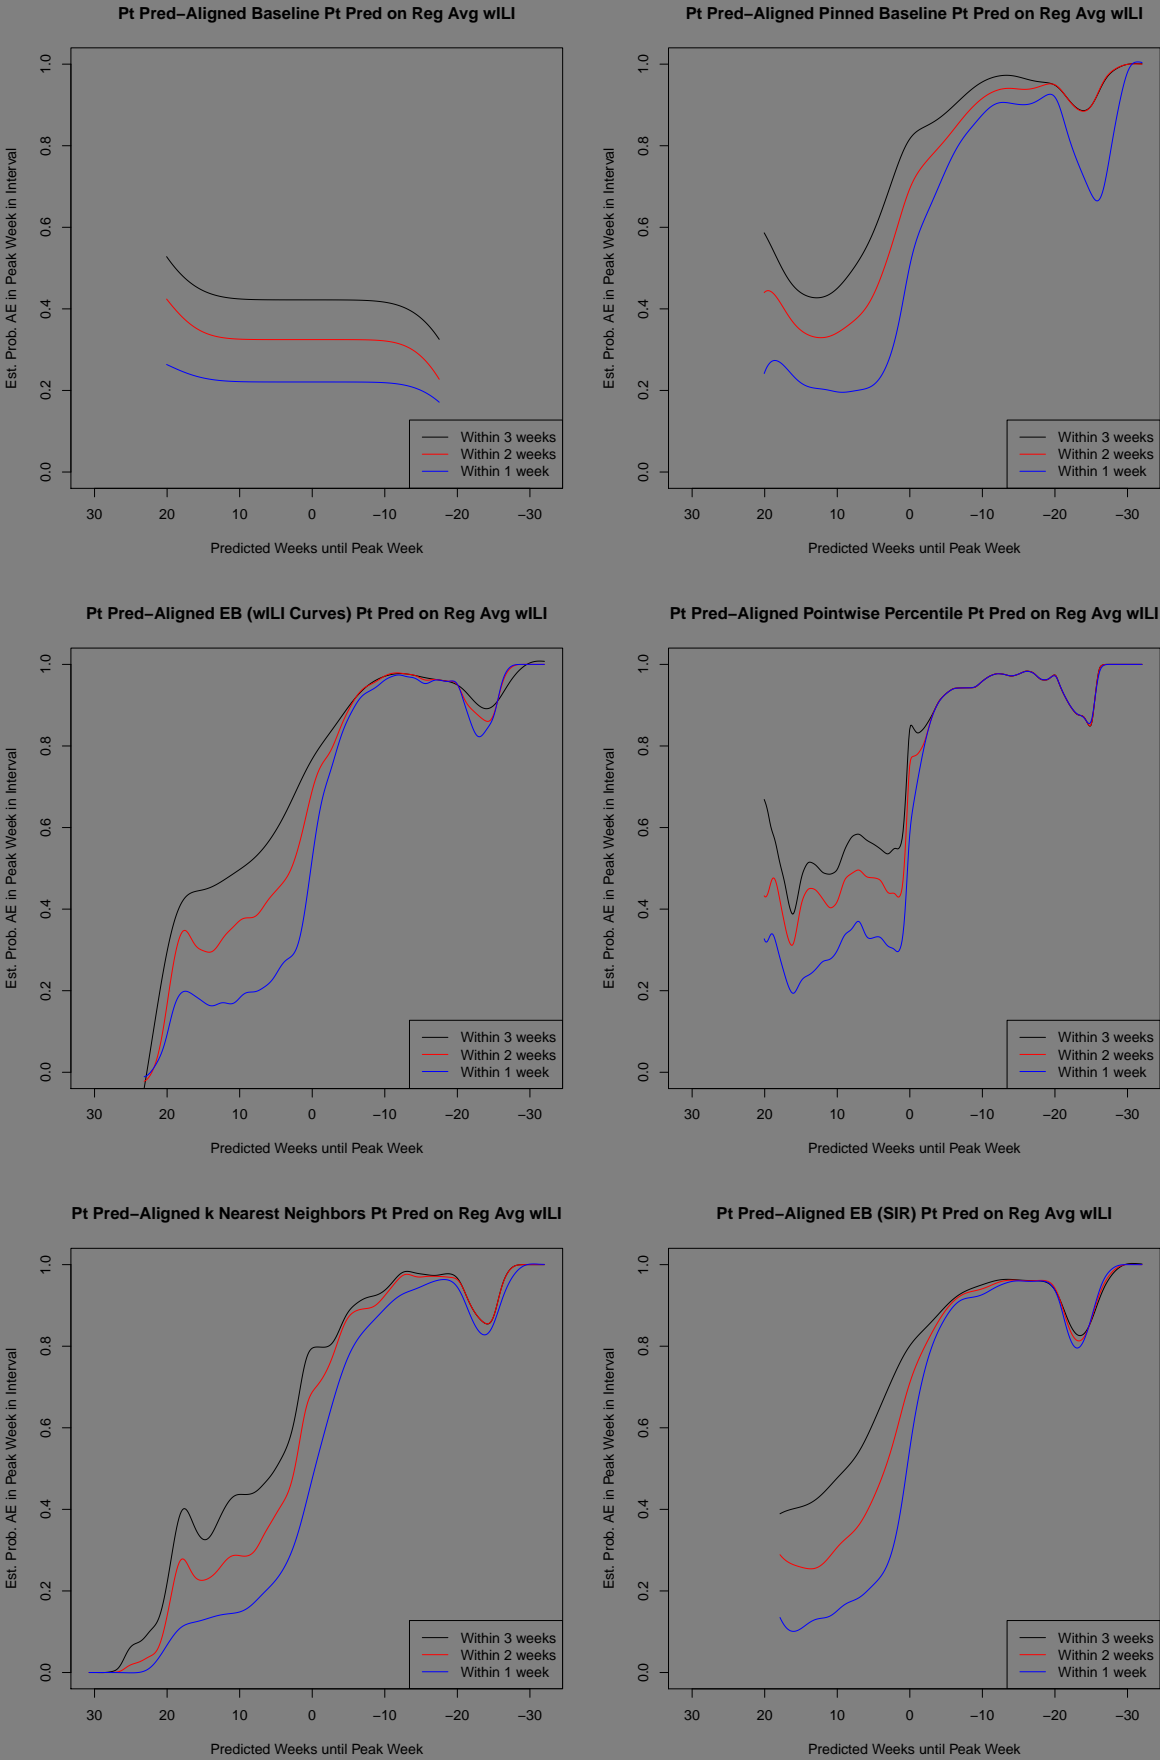

Cross-validated error plots for national and regional point predictions
(C) The estimated probability of point predictions being within certain thresholds of the observed values against predicted onset and peak week.

Cross-validated error plots for national and regional point predictions
(C) The estimated probability of point predictions being within certain thresholds of the observed values against predicted onset and peak week.

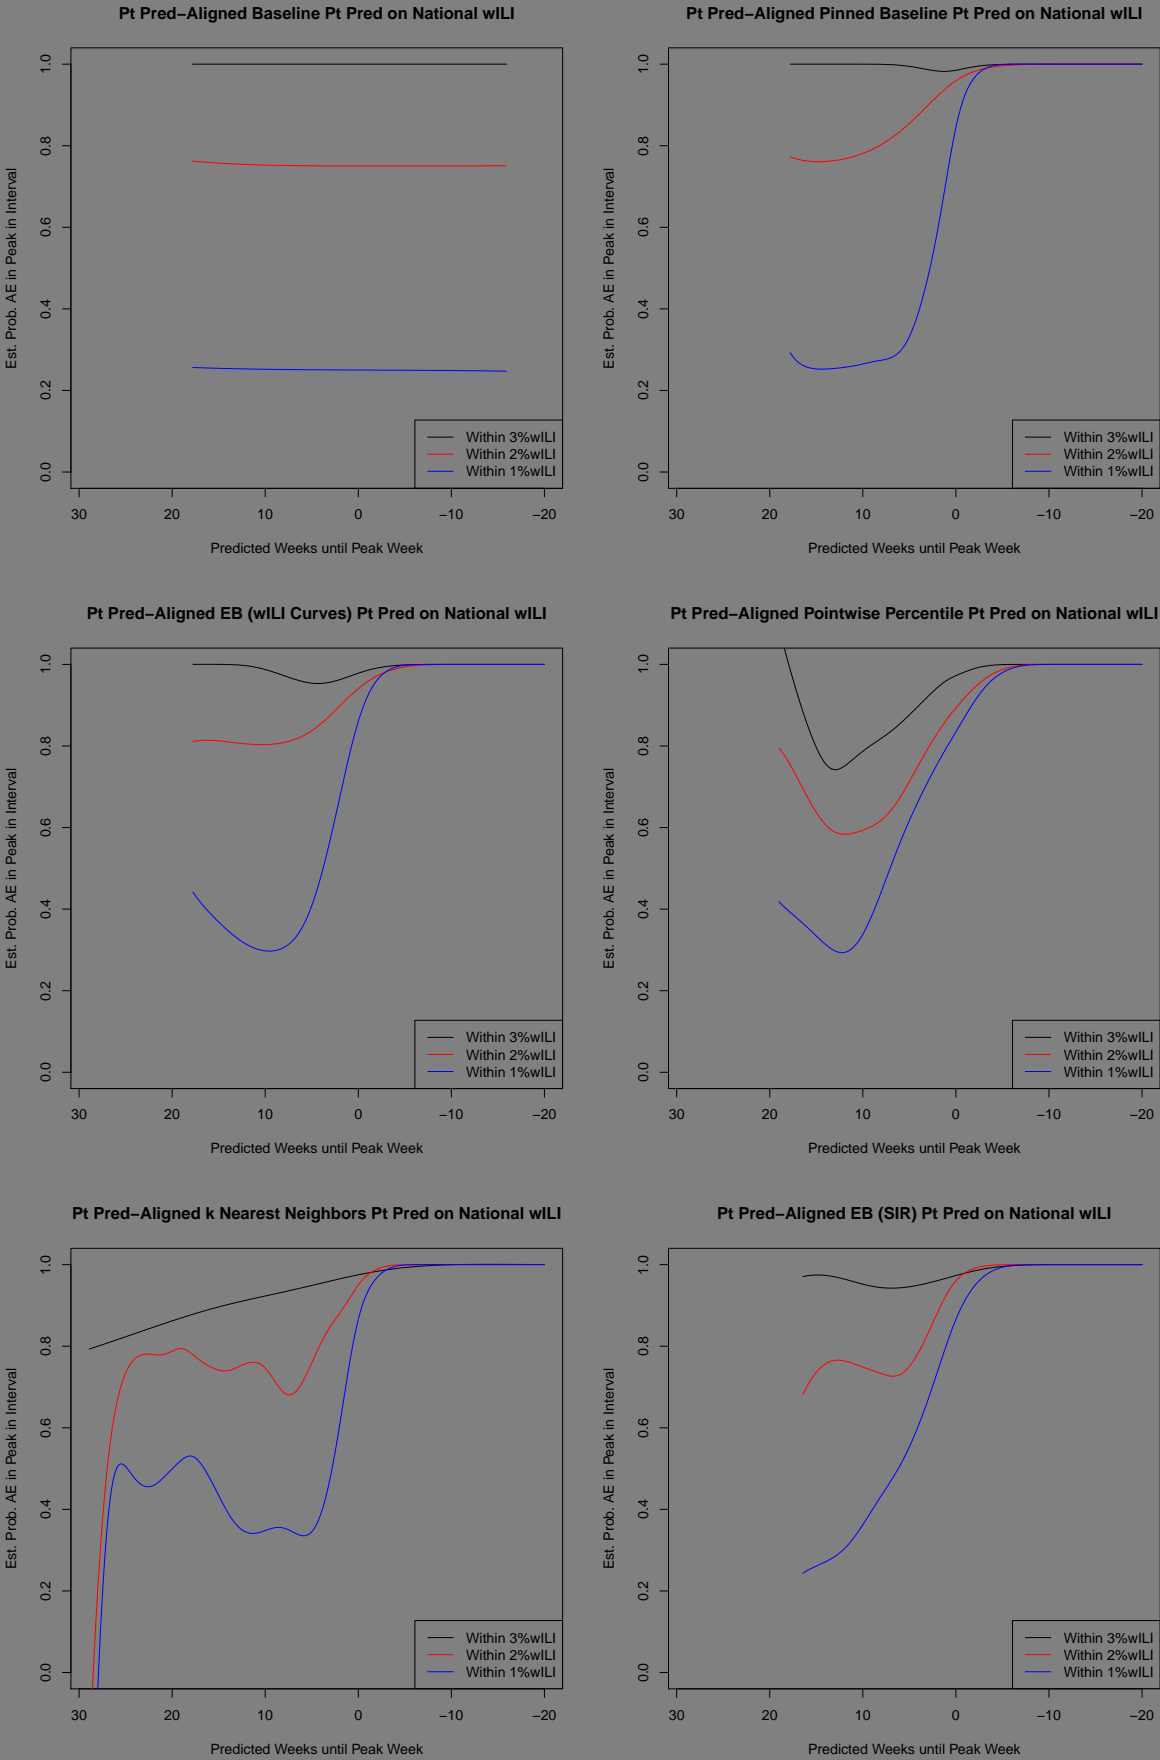

Cross-validated error plots for national and regional point predictions
(C) The estimated probability of point predictions being within certain thresholds of the observed values against predicted onset and peak week.

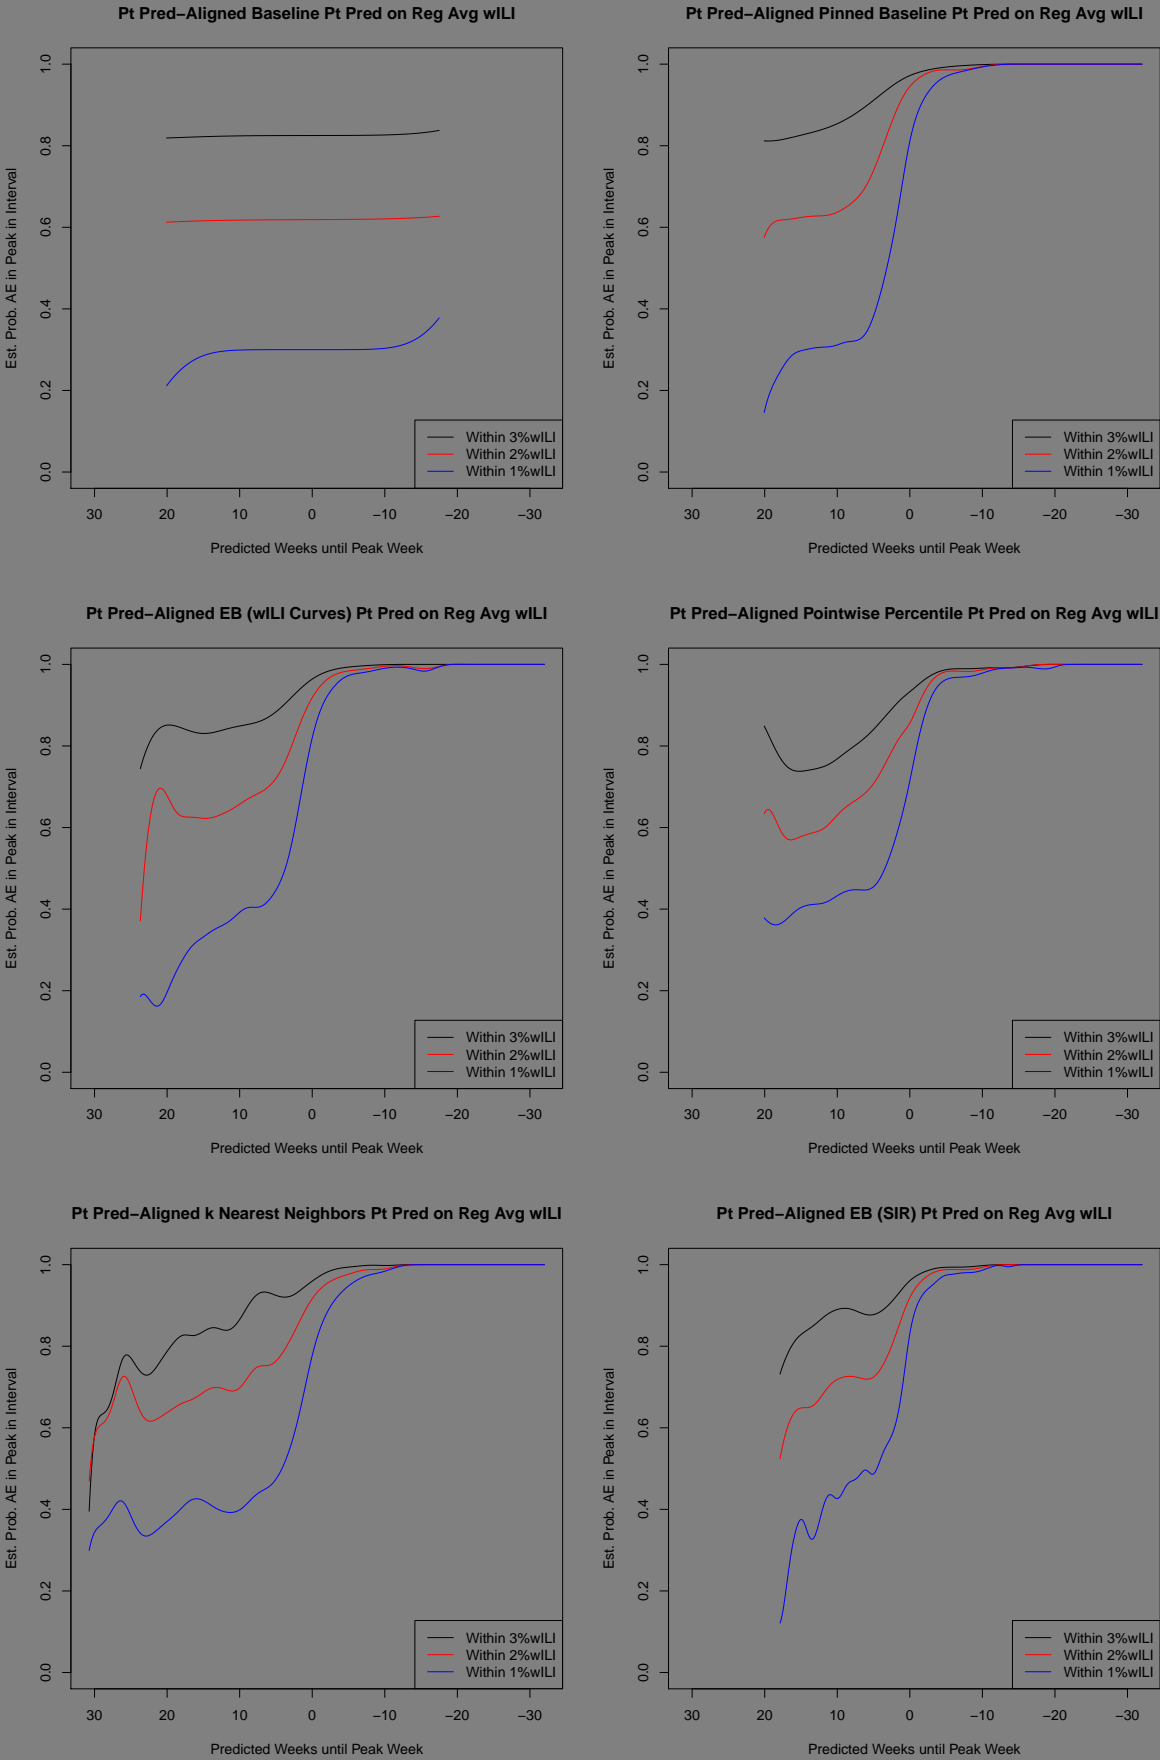

Cross-validated error plots for national and regional point predictions

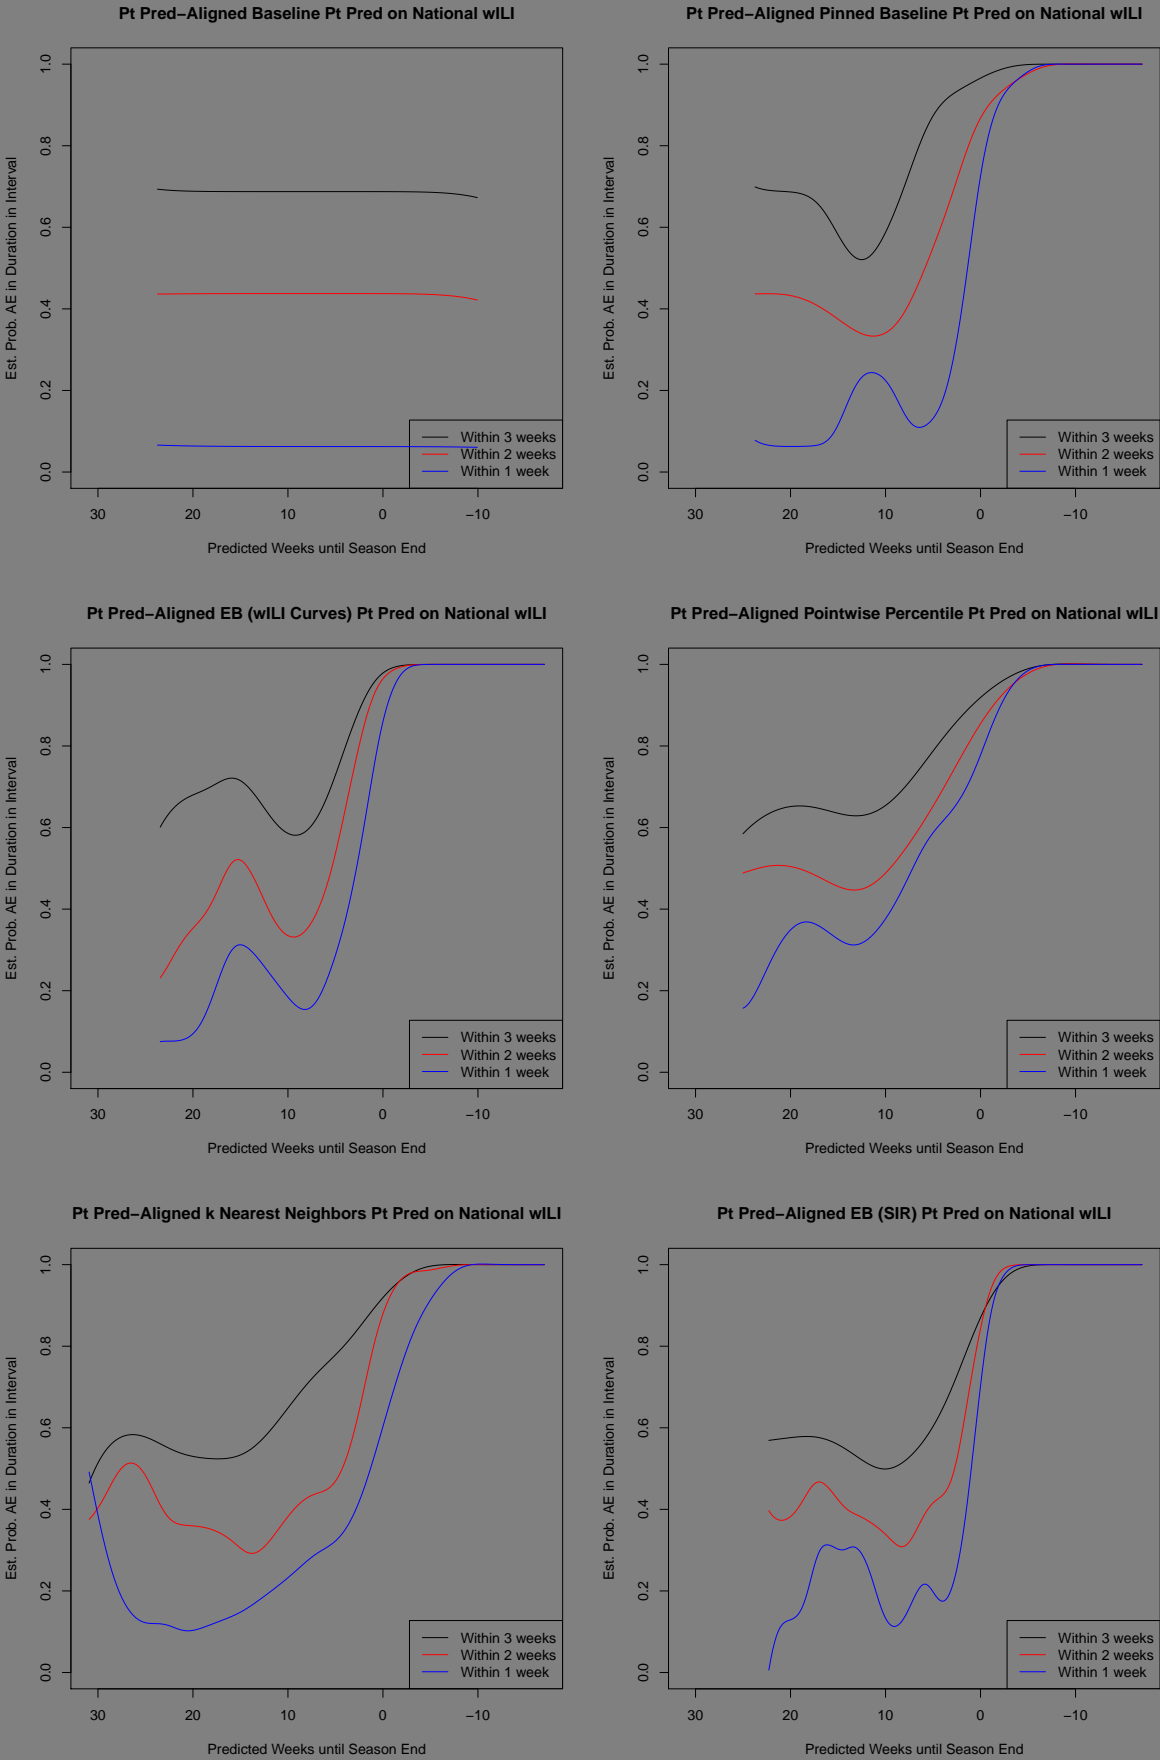

(C) The estimated probability of point predictions being within certain thresholds of the observed values against predicted onset and peak week.

Cross-validated error plots for national and regional point predictions
(C) The estimated probability of point predictions being within certain thresholds of the observed values against predicted onset and peak week.

Cross-validated error plots for national and regional point predictions
(C) The estimated probability of point predictions being within certain thresholds of the observed values against predicted onset and peak week.

Cross-validated error plots for national and regional point predictions
(C) The estimated probability of point predictions being within certain thresholds of the observed values against predicted onset and peak week.
